

Digital Assessment: NCEA Digital Trials and Pilots

As part of NZQA’s digital transformation journey, we are investigating the aim of having all examinations (where appropriate) online by 2020.

Digital Trials and Pilots will help schools and students make the transition to test their readiness, and provide an opportunity for students to experience

General knowledge quiz

NZQA has developed a general knowledge quiz as an activity that enables students to test their knowledge of digital infrastructure (e.g. internet speeds) for the purposes of completing Digital Infrastructure. The use of a quiz was a suggestion from teacher focus groups.

The quiz takes about 20 minutes to complete. We suggest each school to complete the quiz activity at the same time, using the expected infrastructure. This activity is part of the Digital Trials and Pilots on any given day.

Answers have been provided on the PDF below. Students need to 'mark' their answers as they go through the quiz, as the answers are not saved.
