Assessment Method:	Examination
Assessment Medium:	Online or printed paper
Standards:	91462, 91465

[Health subject page](#)

[National secondary examinations timetable](#)

Information relating to all achievement standards

Assessment will be based on the quality of content, rather than the length of the response. Candidates' responses should provide evidence of their own thinking.

Planning spaces are provided. Information in planning spaces will not be marked.

Further information about digital external assessment can be found on the NZQA website.

Resources or information supplied

A resource booklet will be provided for each standard.

Specific information for individual achievement standards

Standard:	91462
Domain:	Health Education
Title:	Analyse an international health issue
Version:	2
Number of credits:	5

Candidates will be expected to apply knowledge and understanding from their learning to scenarios and/or material provided in a separate resource booklet.

Candidates will be required to analyse resources through:

- identifying relevant health determinants
- providing implications for individuals, others, and society
- providing strategies that bring about more equitable outcomes

Candidates should be familiar with health issues related to poverty. These will be derived from:

- disease
- life expectancy
- sexual and reproductive health.

Candidates are required to use specific and relevant research evidence to support their analysis. Refer to [Explanatory Note 4 of the standard](#).

Standard:	91465
Domain:	Health Education
Title:	Evaluate models for health promotion
Version:	2
Number of credits:	5

Candidates are required to use the resources provided to support their analysis with evidence.

Candidates will need to be familiar with various health promotion models and supporting documents, including the Treaty of Waitangi. Refer to [Explanatory Note 3 of the standard](#)
