

## Achievement Standard

<b>Subject Reference</b>	Agricultural and Horticultural Science 3.2		
<b>Title</b>	Research and report on the impact of factors on the profitability of a New Zealand primary product		
<b>Level</b>	3	<b>Credits</b>	6
		<b>Assessment</b>	Internal
<b>Subfield</b>	Science		
<b>Domain</b>	Agricultural and Horticultural Science		
<b>Status</b>	Registered	<b>Status date</b>	4 December 2012
<b>Planned review date</b>	31 December 2020	<b>Date version published</b>	17 November 2016

This achievement standard involves researching and reporting on the impact of factors on the profitability of a New Zealand primary product.

### Achievement Criteria

Achievement	Achievement with Merit	Achievement with Excellence
<ul style="list-style-type: none"> <li>Research and report on the impact of factors on the profitability of a New Zealand primary product.</li> </ul>	<ul style="list-style-type: none"> <li>Effectively research and report on the impact of factors on the profitability of a New Zealand primary product.</li> </ul>	<ul style="list-style-type: none"> <li>Comprehensively research and report on the impact of factors on the profitability of a New Zealand primary product.</li> </ul>

### Explanatory Notes

- This achievement standard is derived from *The New Zealand Curriculum*, Learning Media, Ministry of Education, 2007, and is related to the material in the *Teaching and Learning Guide for Agricultural and Horticultural Science*, Ministry of Education, 2011 at <http://seniorsecondary.tki.org.nz>.
- Research and report* involves:
  - selecting and processing information related to specific factors that may impact on profitability of a New Zealand primary product
  - using the processed information to describe the impact of the factors on the production of a primary product
  - reporting findings in a logical manner.

*Effectively research and report* involves:

- interpreting processed information to explain the impact of the factors on the profitability of a primary product.

*Comprehensively research and report* involves:

- analysing the processed information to justify the impact of the factors on the profitability of a primary product
- reporting findings in a coherent and concise manner, including a summary of key findings.

- 3 *Profitability* refers to the ability to make a profit for the producer. Profitability may be determined by on-farm practices, off-farm processes, and other factors.
- 4 *Factors* may include physical and climatic conditions; social, technological (eg value-added innovations), economic, political, and cultural factors.
- 5 Production refers to all aspects of primary production under producer control, such as production process, management practices, quantity, timing, and product attributes.
- 6 Product attributes are measurable characteristics that affect the profitability of a primary product and may include, fat content, sugar levels, size, mass, diameter, tenderness, shelf life, and yield.
- 7 The report includes:
- a statement of purpose
  - selected and processed information
  - interpretation of findings based on own processed information
  - a valid conclusion(s) that relates to the purpose of the research
  - referencing using a recognised style, so that sources may be verified.
- 8 Conditions of Assessment related to this achievement standard can be found at [www.tki.org.nz/e/community/ncea/conditions-assessment.php](http://www.tki.org.nz/e/community/ncea/conditions-assessment.php).
- 

### Replacement Information

This achievement standard replaced AS90649.
