

Achievement Standard

Subject Reference Agricultural and Horticultural Science 1.1

Title Carry out a practical agricultural or horticultural investigation

Level 1 **Credits** 4 **Assessment** Internal

Subfield Science

Domain Agricultural and Horticultural Science

Status Registered **Status date** 17 December 2010

Planned review date 31 December 2019 **Date version published** 20 November 2014

This achievement standard involves carrying out a practical agricultural or horticultural investigation by planning the investigation, collecting and processing the data, and interpreting and reporting the findings.

Achievement Criteria

Achievement	Achievement with Merit	Achievement with Excellence
<ul style="list-style-type: none"> Carry out a practical agricultural or horticultural investigation. 	<ul style="list-style-type: none"> Carry out an in depth practical agricultural or horticultural investigation. 	<ul style="list-style-type: none"> Carry out a comprehensive practical agricultural or horticultural investigation.

Explanatory Notes

- This achievement standard is derived from *The New Zealand Curriculum*, Learning Media, Ministry of Education, 2007, and based on the outcomes in the *Teaching and Learning Guide for Agricultural and Horticultural Science*, Ministry of Education, 2010 at <http://seniorsecondary.tki.org.nz/>.
- An *investigation* is an activity covering a complete process: planning; collecting, recording, and processing data; interpreting; and reporting on an investigation. It will involve the student in the collection of primary data.
- A *practical agricultural or horticultural investigation* involves:
 - a statement of the purpose – this may be an aim, testable question, prediction, or hypothesis based on a scientific idea
 - identification of a range for the independent variable or sample
 - measurement of the dependent variable
 - collecting, recording and processing data relevant to the purpose
 - a conclusion based on interpretation of the processed data.

An in-depth practical agricultural or horticultural investigation involves:

- a method that describes a valid range for the independent variable or sample; a description of, and/or control of, other variables; the collection of sufficient data
- collecting, recording and processing of data to enable a trend or pattern (or absence) to be determined
- a valid conclusion based on interpretation of the processed data that links to the purpose of the investigation.

A comprehensive practical agricultural or horticultural investigation involves:

- a method that describes a valid range for the independent variable or sample; a description of, and control of, other variables; the collection of sufficient data with consideration of factors such as sampling, bias, and sources of error
- an evaluation that explains how the method used produced valid and reliable data to support a valid conclusion.

- 4 Conditions of Assessment related to this achievement standard can be found at <http://ncea.tki.org.nz/Resources-for-Internally-Assessed-Achievement-Standards>.
-

Quality Assurance

- 1 Providers and Industry Training Organisations must have been granted consent to assess by NZQA before they can register credits from assessment against achievement standards.
- 2 Organisations with consent to assess and Industry Training Organisations assessing against achievement standards must engage with the moderation system that applies to those achievement standards.
