

Achievement Standard

Subject Reference Digital Technologies 1.50

Title Demonstrate understanding of the common components of basic digital infrastructures

Level 1 **Credits** 3 **Assessment** Internal

Subfield Technology

Domain Digital Technologies

Status Expiring **Status date** 20 January 2011

This achievement standard is expiring. Assessment against the standard must take place before the expiry date set out below.

Expiry date 31 December 2018 **Date version published** 23 November 2017

This achievement standard requires demonstrating understanding of the common components of basic digital infrastructures.

Achievement Criteria

Achievement	Achievement with Merit	Achievement with Excellence
<ul style="list-style-type: none"> Demonstrate understanding of the common components of basic digital infrastructures. 	<ul style="list-style-type: none"> Demonstrate in-depth understanding of the common components of basic digital infrastructures. 	<ul style="list-style-type: none"> Demonstrate comprehensive understanding of the common components of basic digital infrastructures.

Explanatory Notes

- 1 This achievement standard is derived from Level 6 of the Technology learning area in *The New Zealand Curriculum*, Learning Media, Ministry of Education, 2007; and is related to the material in the *Teaching and Learning Guide for Technology*, Ministry of Education at <http://seniorsecondary.tki.org.nz>.

Further information can be found at <http://www.technology.tki.org.nz/>.

Appropriate reference information is available in *Safety and Technology Education: A Guidance Manual for New Zealand Schools*, Ministry of Education at <http://technology.tki.org.nz/Curriculum-support/Safety-and-Technology-Education>, and the Health and Safety at Work Act 2015.

This standard is also derived from *Te Marautanga o Aotearoa*. For details of *Te Marautanga o Aotearoa* achievement objectives to which this standard relates, see the [Papa Whakaako](#) for the relevant learning area.

2 *Demonstrate understanding of the common components of basic digital infrastructures* involves describing:

- the purpose of the components of basic digital infrastructures
- the typical connections and data flow between components of a basic digital infrastructure
- key characteristics of components of a basic digital infrastructure that limit their interoperability
- a procedure or protocol for installing or replacing a physical component or a program.

Demonstrate in-depth understanding of the common components of basic digital infrastructures involves explaining:

- how the purpose of components determines the connections between components and the typical flow of data along them
- how the key characteristics of components limit their interoperability
- the importance of procedures and protocols when installing or replacing a component or a program.

Demonstrate comprehensive understanding of the common components of basic digital infrastructures involves discussing:

- the characteristics and limitations of the connections that carry data between components
- the key characteristics used to specify each kind of component in terms of interoperability, tradeoffs, efficiencies, cost, and context of use.

3 Common components of a basic digital infrastructure system:

- Personal computer hardware:
 - motherboard and processor
 - on-board components (e.g. video, USB ports and networking)
 - memory
 - expansion cards (e.g. video, sound)
 - a storage device.
- Associated peripherals:
 - keyboard and mouse
 - Visual Display Units
 - one other external device.
- System software:
 - operating system
 - device drivers
 - disk utilities
 - malware and/or virus checkers.

Demonstrate understanding requires a selection of at least two personal computer hardware components, at least two associated peripheral components, and all of the system software components.

- 4 Characteristics of components are the technical specifications of components that govern how they interact with other components.
 - 5 A procedure is a sequence of steps that can be followed to install or replace a component.
 - 6 A protocol is a sequence of steps that must be followed to install or replace a component.
 - 7 Conditions of Assessment related to this achievement standard can be found at <http://ncea.tki.org.nz/Resources-for-Internally-Assessed-Achievement-Standards>.
-

Replacement Information

This achievement standard and AS91081 were replaced by AS91882.

Quality Assurance

- 1 Providers and Industry Training Organisations must have been granted consent to assess by NZQA before they can register credits from assessment against achievement standards.
- 2 Organisations with consent to assess and Industry Training Organisations assessing against achievement standards must engage with the moderation system that applies to those achievement standards.
