

## National Qualifications Framework (NQF) Data Change to Financial Processes

This circular is to advise all accredited organisations that the New Zealand Qualifications Authority has changed the financial processes for payments associated with NQF data.

The Qualifications Authority will now provide a monthly Statement of Account detailing all payments made and the corresponding debts generated from each set of NQF data that has been processed.

In addition, an invoice will also be provided for each set of data and the total amount due. Please **do not** remit any payments for the invoices received, as the monthly statement of account will summarise any shortfall due.

Included with this circular is a sample invoice and statement.
