

National Certificate in Fibre Cement Linings (Level 4) with strands in Fixing, and Finishing

Level 4

Credits 84-85

This qualification has been **reviewed**. The last date to meet the requirements is 31 December 2019.

Transition Arrangements

Version 6 of this qualification was republished to extend the last date for entry into training programmes (enrolment) leading to this qualification from 31 December 2017 to 31 December 2018. The last date for assessment is unchanged.

This qualification has been reviewed and replaced by the New Zealand Certificate in Interior Linings Installation with strands (Level 4) in Fixing and Finishing and an optional strand in Fibrous Plaster Installation [Ref: 3061].

People currently working towards the replaced qualification may either complete the requirements for that qualification by 31 December 2019 or transfer to the replacement qualification. The last date for entry into programmes leading to this qualification is 31 December 2018.

For detailed information see [Review Summaries](#) on the NZQA website.

This qualification contained expiring unit standards for which replacement unit standards have now been registered. For the purposes of this qualification, people who have gained credit for the replacement unit standards are exempt from the requirement to gain credit for the expiring unit standards.

REVIEWED

National Certificate in Fibre Cement Linings (Level 4) with strands in Fixing, and Finishing

Level	4
Credits	84-85

Purpose

This qualification is designed for those wishing to work in the fibre cement linings sector of the building and construction industry, and provides a means of recognising current competence for those already in the industry.

Holders of this qualification are able to fix or finish fibre cement lining products in construction in the workplace at production rates established by industry. The compulsory section covers core construction techniques and knowledge related to the manufacture and storage of fibre cement sheets. The Fixing Strand covers knowledge of fixing fibre cement sheets to interior surfaces, interior and exterior ceilings, and architectural details. The Finishing Strand covers knowledge of stopping and finishing simple and detailed fibre cement areas on site. Qualification requirements include safe working practices in an on-site environment.

The Building and Construction Industry Training Organisation is responsible for other qualifications that have credits in common in the areas of health, safe working practices, handling construction materials, scaffolding, and basic tool use, allowing people to move readily across sectors of the industry.

Special Notes

Due to the health and safety requirements of the sites in which these trade skills are assessed, people entering programmes of education and training leading to the award of this qualification must demonstrate the capacity to understand all requirements, instructions, and communications (oral, written, and graphic) to the required industry standard. This might be evidenced by unit standards or achievement standards from the *Communication Skills* and *English* subfields at Level 2 or above, or the demonstration of equivalent knowledge and skills.

Assessment for recognition of current competence may be conducted by an assessor appointed by the Building and Construction Industry Training Organisation or an accredited provider.

Applications for the recognition of current competence supported by appropriate documentation should be made to the Operations Manager, Building and Construction Industry Training Organisation.

Credit Range

	Compulsory	Fixing Strand	Finishing Strand
Level 1 credits	1	-	-
Level 2 credits	5	-	-
Level 3 credits	15	14	6
Level 4 credits	4	46	53
Minimum totals	25	60	59

Requirements for Award of Qualification

Award of NZQF National Qualifications

Credit gained for a standard may be used only once to meet the requirements of this qualification.

Unit standards and achievement standards that are equivalent in outcome are mutually exclusive for the purpose of award. The table of mutually exclusive standards is provided on the New Zealand Qualifications Authority (NZQA) website: <http://www.nzqa.govt.nz/qualifications-standards/standards/standards-exclusion-list/>.

Reviewed standards that continue to recognise the same overall outcome are registered as new versions and retain their identification number (ID). Any version of a standard with the same ID may be used to meet qualification requirements that list the ID and/or that specify the past or current classification of the standard.

Summary of Requirements

- Compulsory standards

One of the following strands is required

- Fixing Strand
- Finishing Strand

Detailed Requirements

Compulsory

The following standards are required

Health > Health Studies > First Aid

ID	Title	Level	Credit
6400	Manage first aid in an emergency situation	3	2
6401	Provide first aid	2	1
6402	Provide basic life support	1	1

Manufacturing > Joinery > Joinery Core Skills

ID	Title	Level	Credit
28227	Use tools and equipment with glass, joinery, or joinery related items	3	5

Planning and Construction > Construction Trades > Core Construction

ID	Title	Level	Credit
12997	Demonstrate knowledge of safe working practices on construction sites	3	3
13036	Carry out safe working practices on construction sites	4	4
22145	Handle construction materials	2	2

Planning and Construction > Construction Trades > Fibre Cement Linings

ID	Title	Level	Credit
6068	Identify and describe the manufacture and storage of fibre cement sheets and identify accessories	2	2

Service Sector > Lifting Equipment > Elementary Scaffolding

ID	Title	Level	Credit
9184	Erect and dismantle non-notifiable prefabricated frame scaffolding up to five metres in height	3	5

Fixing Strand

The following standards are required

Planning and Construction > Construction Trades > Core Construction

ID	Title	Level	Credit
2551	Use portable power tools	3	6

Planning and Construction > Construction Trades > Fibre Cement Linings

ID	Title	Level	Credit
6072	Demonstrate knowledge of and fix fibre cement sheets to interior surfaces on site	4	20
6074	Demonstrate knowledge of and fix fibre cement sheets to interior and exterior ceilings on site	4	14
6078	Demonstrate knowledge of and fix fibre cement sheets to architectural details on site	4	12
22157	Calculate quantities, check framing and substrate, and set out for fibre cement linings	3	8

Finishing Strand

The following standards are required

Planning and Construction > Construction Trades > Fibre Cement Linings

ID	Title	Level	Credit
6069	Identify, calculate quantities and order stopping compounds for fibre cement sheets	3	6

ID	Title	Level	Credit
6076	Demonstrate knowledge of, stop and finish fibre cement areas on site	4	35
6077	Demonstrate knowledge of, stop and finish architecturally detailed fibre cement areas on site	4	18

Transition Arrangements

Version 5

Version 5 was issued following revision to maintain achievability after the compulsory unit standard 8492 expired.

Changes to the structure and content

- The qualification total was reduced from 86-87 to 83-84 credits.
- Standard 8492 was removed.
- Standards 26551 and 26552 replaced standards 6400, 6401, and 6402.
- The purpose statement was updated.

People currently enrolled in programmes leading towards the award of version 4 of this qualification may complete that version if unit standard 8492 is registered as achieved on their record of achievement.

People currently enrolled in programmes leading towards the award of version 4 of this qualification who do not have unit standard 8492 registered as achieved on their record of achievement can transfer to version 5. All new trainees will be enrolled in programmes leading to version 5.

For detailed information see [Review Summaries](#) on the NZQA website.

This qualification contains standards that replace earlier standards. For the purposes of this qualification, people who have gained credit for the replaced standards are exempt from the requirement to gain credit for the replacement standards – see table below.

Credit for	Exempt from
6070	22157
26551, 26552	6400, 6401, 6402
26551	6402
26552	6401

It is not intended that anyone be disadvantaged by this revision. However, anyone who feels they have been disadvantaged may appeal to Building and Construction Industry Training Organisation at the contact details below.

Previous versions of the qualification

This qualification was reviewed and issued as Version 4 following a review of the *Fibre Cement Linings* standards. The content was updated to meet changing industry needs.

Changes to structure and content included: details of standards were updated to reflect the outcome of reviews; standards 13036, 12997, and 9184 were reclassified to the *Core Construction* domain and the qualification was updated to reflect the change; standards 8492 and 22145 were added to the compulsory section; standards 6071 and 6073 were removed, and standard 22157 replaced standard 6070 in the Fixing Strand; standard 6075 was removed from Finishing Strand; the level of the qualification was added to the title; the credit range for the qualification was changed from 81-87 to 86-87.

People currently working towards Version 3 may choose to complete that version or transfer their results to Version 4. The final date for entry into Version 3 is 31 December 2008.

Version 4 of this qualification contains standards that replace earlier standards. For the purposes of this qualification, people who have gained credit for the expiring standards are exempt from the requirement to gain credit for the replacement standards – see table below.

Credit for	Exempt from
6070	22157

Version 4 of this qualification contains standards that were replaced. For the purposes of this qualification, people who have gained credit for the replacement standards are exempt from the requirement to gain credit for the replaced standards – see table below.

Credit for	Exempt from
26551, 26552	6400, 6401, 6402
26552	6401
26551	6402

Version 3 was issued in September 2000 following the review of *Construction Trades* standards. Changes to structure and content included: two strands were created, one for Fixing, and one for Finishing; standards 2551 and 6069-6078 were moved from the compulsory section to the strands; the title was updated to reflect the addition of strands; *Core Health* standard 6401 was added to the compulsory section; minimum credit total increased from 60 to 81-87; and the level increased from 3 to 4.

The following exemptions apply to people completing Version 3 of the qualification.

Earlier versions of the qualification contained standards for fixing and finishing at two levels. People credited with the higher level standards are exempt from the lower level standards as specified – see table below.

Credit for	Exempt from
6072	6071
6074	6073
6076	6075

This qualification contains standards that replace an earlier standard. For the purposes of this qualification, people who have gained credit for the expiring standards are exempt from the requirement to gain credit for the replacement standards – see table below.

Credit for	Exempt from
598	12997, 13036

Please note that the transition exemption for standard 598 is limited to people completing Version 3.

Version 2 was issued following a review of the *Carpentry* standards; standard 598 was replaced by standards 12997 and 13036.

All versions of this qualification will be recognised by the Building and Construction Industry Training Organisation.

Other standard setting bodies whose standards are included in the qualification

Joinery Industry Training Organisation
 NZQA

Certification

The certificate will display the logos of NZQA, the Building and Construction Industry Training Organisation and the organisation that has been granted consent to assess against standards that meet the requirements of the qualification (accredited).

Classification

This qualification is classified according to the classification system listed on the Directory of Assessment Standards (DAS) and the New Zealand Standard Classification of Education (NZSCED) system as specified below.

DAS Classification		NZSCED	
Code	Description	Code	Description

DAS Classification		NZSCED	
Code	Description	Code	Description
1238	Planning and Construction > Construction Trades > Fibre Cement Linings	040313	Architecture and Building > Building > Ceiling, Wall and Floor Fixing

Quality Management Systems

Providers and Industry Training Organisations must be granted consent to assess by a recognised Quality Assurance Body before they can register credits from assessment against standards. Organisation with consent to assess and Industry Training Organisations assessing against standards must engage with the moderation system that applies to those standards. Consent to assess requirements and the moderation system are outlined in the associated Consent and Moderation Requirements (CMR) for each standard.
