National Diploma in Security Management (Level 6)

Level   **6**

Credits   **120**

Purpose

This diploma provides a nationally recognised qualification for managers of security business functions in security companies or organisations. It combines a wide range of generally applicable business management skills with knowledge of the security industry. For the more technical aspects of the security industry, as opposed to the management of business functions, refer to the National Diploma in Security (Level 6) [Ref: 1059].

Many people seeking this diploma will already be qualified as supervisors in the security field, and may hold the National Certificate in Security Management (Supervision) (Level 5) [Ref: 0561]. However, this is not a prerequisite.

This diploma may lead to more advanced training in professional management or to the National Diploma in Security (Level 6) [Ref: 1059].

Credit Range

	Compulsory	**Elective**
Level 4 credits	-	0-48
Level 5 credits	-	0-48

		Small Business Management

Transition Arrangements

Version 3

Version 3 was issued following a minor revision of the qualification to maintain currency until a thorough review can take place.

Changes to structure and content
- Elective set updated to include new domains in the Business Operations and Development subfield
- review date updated to 2009.

For detailed information see Review Summaries on the NZQA website.

Candidates may either complete the requirements for version 2 or transfer to version 3.

It is not intended that anyone be disadvantaged by this revision, and the above arrangements have been designed for a smooth transition. However, anyone who feels they have been disadvantaged may appeal to the ElectroTechnology Industry Training Organisation at the address below.

Previous version of the qualification

Version 2 was issued following revision by the security industry in conjunction with the development of the National Diploma in Security (Level 6) [Ref: 1059]. The purpose of the revision was to reduce overlap between the two qualifications and to highlight the differences between them.

Other standard setting body whose standards is included in the qualification

NZQA

Certification

The certificate will display the logos of NZQA, the ElectroTechnology Industry Training Organisation and the accredited organisation.

Quality Management Systems
Providers and Industry Training Organisations must be accredited by a recognised Quality Assurance Body before they can register credits from assessment against standards. Accredited providers and Industry Training Organisations assessing against standards must engage with the moderation system that applies to those standards. Accreditation requirements and the moderation system are outlined in the associated Accreditation and Moderation Action Plan (AMAP) for each standard.
