## Field Engineering and Technology

## Development of new Generic Infrastructure Works unit standard 27907

Subfield	Domain	ID
Infrastructure Works	Generic Infrastructure	27907
illiastructure vvoiks	Works	21901

InfraTrain New Zealand Ltd has completed the development of the unit standard above.

Date published October 2012

Planned review date December 2017

## **Summary**

On advice from industry, an advisory group of Traffic and Safety Management and Engineering practitioner's from New Zealand Transport Agency (NZTA) met with InfraTrain NZ Ltd in June 2011 and determined that a new standard should be developed to recognise the knowledge and skills required of Local Authority, Consultants, and Contractors involved in the design or certification and audit of safety barriers.

Industry and NZTA were consulted and their advice and suggestions were incorporated into the new standard. The standard was endorsed by the advisory group in August 2012.
