Field Manufacturing

Revision of *Dairy Manufacturing* qualification

National Certificate in Dairy Manufacturing (Environmental Systems) (Level 3) [Ref: 1062]

The New Zealand Industry Training Organisation has revised the qualification above.

Date new version published

October 2013

The next qualification review is planned to take place during 2013.

Reason for the revision

This qualification is due for review under the Targeted Review of Qualifications (TRoQ) process in 2013, however it includes an expired unit standard which is stopping learners from meeting the qualification requirements. The replacement unit standard has been included in the compulsory section and the credit total of the qualification increased. This revision is designed to keep the qualification current until its scheduled review.

Main changes resulting from the revision

National Certificate in Dairy Manufacturing (Environmental Systems) (Level 3) [Ref: 1062]

Changes to structure and content

- Expired standard 3062 has been removed from the compulsory section and its replacement standard 21467 has been added.
- The qualification total has been increased to 43 credits as a result of the addition of standard 21467 and to ensure the elective section remains meaningful.
- Addition of reverse transition to allow completion of versions 1 and 2.

Transition

People currently working towards version 1 or 2 of this qualification may either complete that version or transfer their results to version 3. The last date for assessments to take place for versions 1 and 2 is 31 December 2014.

This qualification contains a standard that replaced an earlier standard. For the purposes of this qualification, people who have gained credit for the expired standard are exempt from the requirement to gain credit for the replacement standard – see table below.

Credit for	Exempt from
3062	21467

Reverse transition

Reverse transition has been included for versions 1 and 2 of this qualification to allow candidates to complete the qualification using the expired standard or replacement standard.

Versions 1 and 2 of the qualification contain a standard that has been replaced by a later standard. For the purposes of this qualification, people who have gained credit for the replacement standard are exempt from the requirement to gain credit for the expired standard – see table below.

Credit for	Exempt from
21467	3062

It is anticipated that no existing candidates will be disadvantaged by these transition arrangements. However, anyone who feels that they have been disadvantaged may appeal to the New Zealand Industry Training Organisation (NZITO) at the address below. Appeals will be considered on a case by case basis.
