Title	epair mechanical air data instrument components			
Level	4	Credits	30	

Purpose	People credited with this unit standard are able to: prepare to repair mechanical air data instrument components; locate defects in mechanical air data instrument components; repair mechanical air data instrument components; test and adjust mechanical air data instrument components; and complete the repair task.
---------	--

Classification	Aeronautical Engineering > Avionic Instrument Repair
Available grade	Achieved

Guidance Information

- 1 All tasks must be carried out in accordance with enterprise procedures.
- 2 Definition

Enterprise procedures – procedures used by the organisation carrying out the work and applicable to the tasks being carried out. Examples are – standard operating procedures, safety procedures, equipment operating procedures, codes of practice, quality management practices and standards, procedures to comply with legislative and local body requirements.

- 3 The repair activities referred to in this unit standard are those usually carried out in a specialist bay or workshop on components that have been removed from the aircraft.
- 4 Mechanical air data instrument components may include controllers, Static Air Temperature and True Air Speed computers, barometric altimeters, airspeed indicators, Mach meters, vertical speed indicators.

Outcomes and performance criteria

Outcome 1

Prepare to repair mechanical air data instrument components.

Performance criteria

1.1 Task is determined by reviewing maintenance documentation and enterprise procedures.

Range confirm fault, repair, modify.

- 1.2 Work area is prepared, and resources obtained and checked for serviceability or status.
 - may include but is not limited to publications, materials, tools, Range equipment, safety equipment, environmental conditions established.
- 1.3 Component identity is matched with documentation.
- 1.4 Component is prepared for repair.

clean, inspect, assess economics of carrying out repair. Range

1.5 Next task is determined and documented.

> Range locate defects, repair, test, adjust, complete the task.

Outcome 2

Locate defects in mechanical air data instrument components.

Performance criteria

- 2.1 Defects are located using troubleshooting techniques and inspection procedures appropriate to the defect indications.
- 2.2 Any defects are reported and documented.

Outcome 3

Repair mechanical air data instrument components.

Performance criteria

3.1	.1 Component is disassembled.		
	Range	clean, label, preserve, segregate, store.	
3.2	Rectification action is determined and documented.		
3.3	Parts are procured and verified as authentic and serviceabl		
	Range	identify, inspect.	
3.4 Defects are rectified.		rectified.	
	Range	repair, replace, modify, adjust.	

3.5 Component is assembled. 3.6 Inspections are obtained.

Range independent, duplicate, progressive.

Outcome 4

Test and adjust mechanical air data instrument components.

Performance criteria

- 4.1 Component is prepared for testing.
- 4.2 Component is tested and adjusted.
 - Range may include but is not limited to troubleshoot, functionally test, calibrate, adjust, document adjustments and performance.
- 4.3 Inspections are obtained.

Range independent, duplicate, progressive.

Outcome 5

Complete the repair task.

Performance criteria

5.1	Component is prepared.		
	Range	may include but is not limited to – use, storage, transit, locking, inhibiting, blanking, packing, shelf-life requirement.	
5.2	Resources a	re checked for serviceability and returned to service or storage.	
	Range	may include but is not limited to – tools, equipment, safety equipment, publications.	
5.3	Leftover part	s and materials are disposed of.	
	Range	may include but is not limited to – serviceable, unserviceable, surplus, waste, scrap, hazardous.	
5.4	Documentation is completed.		
	Range	may include but is not limited to – labels, work cards, release notes, logbooks, certification.	
5.5	Work area is	left in a state that enables the next task to begin.	

Replacement information	This unit standard, unit standard 22559, and unit standard 22561 replaced unit standard 3972.

Planned review date	31 December 2025	

Status information and last date for assessment for superseded versions

Process	Version	Date	Last Date for Assessment
Registration	1	19 May 2006	31 December 2016
Revision	2	21 September 2007	31 December 2016
Review	3	24 October 2014	31 December 2022
Review	4	23 July 2020	N/A
