

Title	Apply legislative and enterprise demands in the aeronautical maintenance workplace		
Level	6	Credits	20

Purpose	<p>This unit standard is intended for people controlling aeronautical engineering maintenance activities.</p> <p>People credited with this unit standard are able to: demonstrate an understanding of legislative demands and enterprise procedures that apply in an aeronautical maintenance workplace; and ensure compliance with legislative demands and enterprise procedures in an aeronautical maintenance workplace.</p>
----------------	---

Classification	Aeronautical Engineering > Aeronautical Engineering Production Control
-----------------------	--

Available grade	Achieved
------------------------	----------

Guidance Information

- 1 All tasks are to be carried out in accordance with enterprise procedures, the enterprise being the organisation carrying out the work. Enterprise procedures referred to in this unit standard are the applicable procedures found in the following: enterprise exposition; manufacturer publications; Government and local body legislation; airworthiness authority requirements.
- 2 Production Control relates to the supervision and management of an aeronautical maintenance activity in the workplace. The production control role is distinct from the maintenance planning role.
- 3 Definition
Aeronautical maintenance activity – scheduled or unscheduled activities that may include: servicing, maintenance, repair, overhaul, recondition, rectification, fabrication or manufacture.
- 4 This standard is part of a group of five in the Production Control domain that relate specifically to the production control role in an aeronautical maintenance workplace. These units include: Unit 32829, *Initiate an aeronautical maintenance activity*; Unit 32830, *Conclude an aeronautical maintenance activity*; Unit 32831, *Control aeronautical defect rectification activities*; and Unit 32833, *Control the quality of work in an aeronautical maintenance workplace*.

Outcomes and performance criteria

Outcome 1

Demonstrate an understanding of legislative demands and enterprise procedures that apply in an aeronautical maintenance workplace.

Range in terms of applicability to, and effect on, the activity being carried out.

Performance criteria

- 1.1 Airworthiness authority demands applicable to the activity being carried out are identified and analysed.
- 1.2 Enterprise procedures applicable to the activity being carried out are identified and analysed.
- 1.3 Government and local body regulations applicable to the activity being carried out are identified and analysed.

Outcome 2

Ensure compliance with legislative demands and enterprise procedures in an aeronautical maintenance workplace.

Performance criteria

- 2.1 Work activities are monitored to a level that verifies compliance with legislative demands and enterprise procedures.
 - 2.2 Non-compliances with legislative demands and enterprise procedures are rectified in accordance with enterprise procedures.
 - 2.3 Staff are trained in accordance with enterprise procedures to a level that ensures action is taken to preserve life in emergency situations.

Range may include but not limited to – first aid, evacuation, fire, natural disaster.
 - 2.4 Accidents and incidents are investigated to a level that enables causes to be identified.
 - 2.5 Action is taken to prevent recurrence of accidents and incidents in accordance with enterprise procedures.
 - 2.6 Procedures that will ensure compliance with enterprise procedures for contractors and visitors to the worksite are implemented.
-

Replacement information	This unit standard replaced unit standard 10801.
