

NCEA Online

Your Story

Each school is somewhere on their journey to delivering digital exams. Use this template to describe a recent example for your school looking at a barrier or enabler to delivering digital exams.

Barrier/Enabler

E.g. devices, student confidence, infrastructure

Senior Leadership confidence

Your challenge:

(1-2 sentences)

We (English + History) teachers already do lots of our teaching digitally. We decided to enter our level 1 students. Snr. Leadership didn't stop us but thought online was too hard + risky.

How did you overcome this challenge? If you haven't, how did you decide that you're not yet able to?

(3-4 sentences)

We started small (just a couple of classes) so we could focus on delivering the best possible experience. Built student confidence using practice activities + past digital exams on NZQA website. Our school technician helped students check their devices + worked with N42 so we knew the internet would be good in the exam rooms.

Outcome:

(1-2 sentences)

Nearly all our students completed their exams digitally + found it positive. This year the school is going to offer digital exams as an option to all subjects learning digitally.

What do you need to do next?

E.g. to overcome our barrier or to boost our digital entries

(2-3 sentences)

Now a lot more students + teachers will be involved, SLT has asked us to share what we've learnt with these teachers + to identify some experienced students to act as champions + mentors.
