

## Unit standard review support package

A review support package is available on request from Service Support if a standard-setting body is planning a review of unit standards. It is recommended that you request this information well before the planned start of consultation.

The review support package consists of:

- Electronic versions of the unit standards to be reviewed
- Qualification Impact Report - an Excel workbook with spreadsheets of NZQF national qualifications that might be affected by the review:
  - By specific unit standards
  - By the subfields or domains in elective sets
- Provider Impact Report - a text file that lists all organisations that have consent to assess against the standards that might be affected by the review:
  - Field
  - Subfield
  - Domain
  - Specific unit standard
- Draft Change Report, with current unit standard details in the summary table. For a copy of these review reports see [Qualifications and assessment standards approvals](#).
