A key ethical principle is a set of rules that are put in place for a particular religion or group of people. There are different types of Euthanasia and it can be hard to understand the difference between them.

For euthanasia two key principles which could be used are the protection of life and justice demands love (11). Life has to be protected because God created us and only God can take life away. God loves us and so we should love all life and if we use Euthanasia the we are not showing love. (11) Jesus did in John’s Gospel love one another as I have loved you (12). So if we kill someone by using Euthanasia we are not loving them like Jesus would of.
