

1. Good silhouette. Curves nice shape.

2. Pleats. Like the colour. Pleats are nice, the colour not too sure on the way they are sitting though. Maybe longer & lighter?

3. Love the satin band - it makes them formal. Soft pleats but not too loose. Great colour = very suitable for evening. MW

4. Colour interesting depends on clients taste. Mature design that would look good. I really like the drape look. Will explore with wrap dresses.

5. Drape - will explore this idea. Don't like the 2nd drape. Too busy MW.

6. Not fussed on these??

7. Top 100% casual.

8. Really like this design.

9. More complex colour. I really like the drape. Think that it is.

3. Evaluation of Research

After looking at the feedback on the research, I can see the ideas of trousers with pleats are popular. The trousers numbered 3 and 7 got the best response, from both my client and other stakeholders. I will explore this concept, as it will suit with the context and look very smart and stylish. I will develop ideas of patterned fabric as well, as my client and other stakeholders have commented on this. Another popular idea that could work well is the draped fabric and wrap dresses. I found the

Student 6: High Not Achieved

NZQA Intended for teacher use only

4. These ones!! LIKE Love!!

5. Same fabric as waist band.

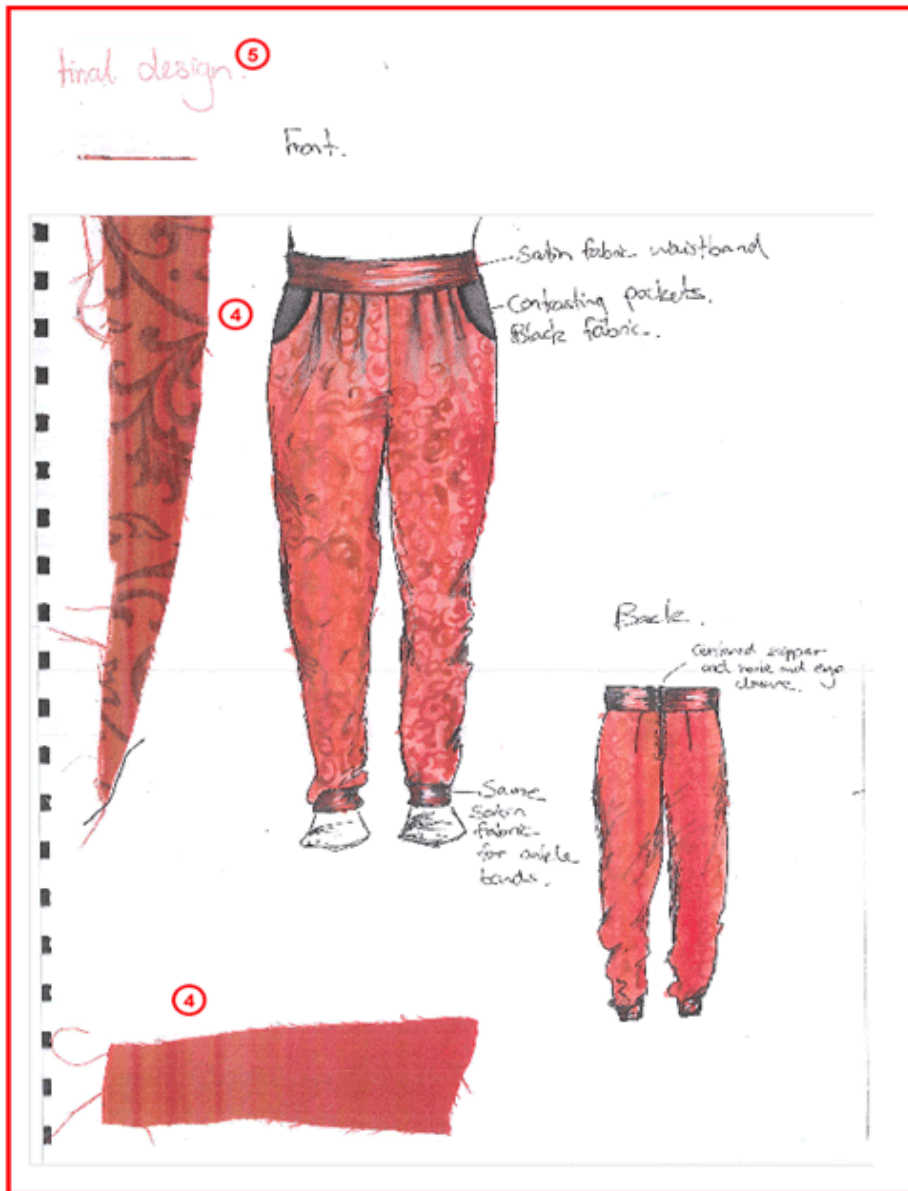

6. All the colour are great. Cool casual design.

7. Like the high waisted.

8. Feedback on concepts.

9. No 5 I like, the style is so simple but very e I can imagine that on, hanging softly with a flowing material. The colour is lovely. I like the style and colour of no 4. The shoulder straps are nice. Very classy!!

10. If you're looking for a more formal look, I like the look of no 5; cute, simple, smart casual. Both dresses are beautiful but I really prefer no 5 (probably bias as love is my fave colour). I love no 9 points & would suggest them if you want it to be more casual. The waist line would be very flattering to the figure & colour isn't too vibrant which is a good idea for no 9.

Fitness for purpose. ⑥:

I have designed and made ~~trousers~~ trousers for my client to wear to her birthday dinner. Due to the versatility of the style, they will also be easily adapted to suit many scenarios. It is suitable for the event because they are stylish, which fits in with the setting of the vibrance of The String Room, they are easy to sit and move in as they are quite a ~~the~~ loose design.

It suits my client because of how it works with her tastes and suitable colours. Her eyes are brown, skin tone fair/light and her colouring is 'winter' which suits darker/brighter colours such as blues and reds. This colour works in well with colouring and the boldness of the design will look striking on her although not many people would be able to pull the off. The pants will go with a plain top, long or short. Black will go best with the bright red, as it will balance out the outfit. The length of the garment is fit for purpose as legs are long and they are long enough for her.
