

Title	Maintain aircraft fuel storage and distribution systems		
Level	4	Credits	20

Purpose	People credited with this unit standard are able to: prepare to maintain aircraft fuel storage and distribution systems; locate defects in fuel storage and distribution systems; restore airworthiness of fuel storage and distribution systems; and complete finishing activities related to maintaining fuel storage and distribution systems.
----------------	---

Classification	Aeronautical Engineering > Aircraft Mechanical Maintenance
-----------------------	--

Available grade	Achieved
------------------------	----------

Guidance Information

- 1 All tasks must be carried out in accordance with enterprise procedures.
 - 2 Definition
Enterprise procedures – procedures used by the organisation carrying out the work and applicable to the tasks being carried out. Examples are – standard operating procedures, safety procedures, equipment operating procedures, codes of practice, quality management practices and standards, procedures to comply with legislative and local body requirements.
 - 3 Aircraft fuel storage and distribution systems include fuel tanks and distribution systems up to, but excluding the engine pumps, carburettors, or fuel control units.
 - 4 The scope of the system that this standard relates to is described in ATA iSpec 2200, chapter 28.
-

Outcomes and performance criteria

Outcome 1

Prepare to maintain aircraft fuel storage and distribution systems.

Performance criteria

- 1.1 Task is determined by reviewing maintenance documentation.

1.2 Resources are obtained and checked for serviceability or status.

Range may include but is not limited to – publications, tools, equipment, safety equipment, materials.

1.3 Aircraft registration and system to be maintained are matched with documentation.

1.4 Aircraft and system are prepared for the application of power and for system operation.

Range may include but is not limited to – cockpit controls match component positions, clearances obtained, isolation tags, warning signs, purging tanks to achieve non-explosive atmosphere.

1.5 Ground and/or support equipment is positioned ready for system operation.

Outcome 2

Locate defects in fuel storage and distribution systems.

Performance criteria

2.1 Serviceability is determined.

Range inspect, assess, test.

2.2 Defects are reported and documented.

Outcome 3

Restore airworthiness of fuel storage and distribution systems.

Performance criteria

3.1 Methods of rectifying defects are determined.

3.2 Replacement parts are procured and verified as authentic and serviceable.

Range identify, inspect.

3.3 Defects are rectified.

Range may include but is not limited to – repair, replace, modify, adjust, calibrate, lubricate.

3.4 System is tested to verify serviceability.

3.5 Inspections are obtained.

Outcome 4

Complete finishing activities related to maintaining fuel storage and distribution systems.

Performance criteria

4.1 Completion activities specific to the task and work area are carried out.

Range may include but is not limited to – tool control, cleanliness, tidiness, return of publications, return of system/aircraft to normal, preparation for next activity.

4.2 Resources are checked for serviceability and returned to service or storage.

Range tools, equipment, safety equipment.

4.3 Leftover parts and materials are disposed of.

Range may include but is not limited to – serviceable, unserviceable, surplus, waste, scrap, hazardous.

4.4 Documentation is completed.

Planned review date	31 December 2024
----------------------------	------------------

Status information and last date for assessment for superseded versions

Process	Version	Date	Last Date for Assessment
Registration	1	19 June 1995	31 December 2016
Revision	2	7 August 1997	31 December 2016
Revision	3	8 May 2001	31 December 2016
Review	4	25 September 2006	31 December 2016
Review	5	17 July 2014	31 December 2021
Review	6	26 March 2020	N/A
