

Title	Identify levels of finish, calculate quantities and order stopping and finishing compounds for plaster board		
Level	3	Credits	6

Purpose	People credited with this unit standard are able to identify levels of finish to plaster board walls and ceilings, and calculate quantities of materials required and prepare an order.
----------------	---

Classification	Construction Trades > Plaster Board
-----------------------	-------------------------------------

Available grade	Achieved
------------------------	----------

Guidance Information

- 1 Definition
Specifications refers to documented instructions (oral, written, graphic) and may include any of the following: manufacturer's specifications, recommendations or technical data sheets; material specifications; specifications from a specialist source such as an architect, designer, engineer or a supervisor; site or work specific requirements.
- 2 Reference material
AS/NZS 2589:2007 *Gypsum linings - Application and finishing*, available from Standards NZ (<http://www.standards.co.nz>).
- 3 Credit for this unit standard can be achieved on site through a registered assessor, or off site with an accredited training provider.
- 4 Credit for this unit standard indicates compliance with industry practice. *Industry practice* refers to the ability to demonstrate knowledge and skills that reflect the productivity, uniformity, finish quality and material economies currently accepted within industry.

Outcomes and performance criteria

Outcome 1

Identify and describe levels of finish to plaster board walls and ceilings.

Performance criteria

- 1.1 Levels of finish for plasterboard work are described as specified by AS/NZS 2589:2007.

- 1.2 The description identifies the stopping and finishing compounds required to achieve the specified levels of finish.

Outcome 2

Calculate quantities of materials required and prepare an order.

Performance criteria

- 2.1 Area to be stopped and finished is identified from working drawings or specifications.
- 2.2 Quantities of materials are calculated, and an order is prepared to the nearest unit of supply.

This unit standard is expiring. Assessment against the standard must take place by the last date for assessment set out below.

Status information and last date for assessment for superseded versions

Process	Version	Date	Last Date for Assessment
