

Achievement Standard

Subject Reference Digital Technologies 2.44

Title Demonstrate understanding of advanced concepts from computer science

Level 2 **Credits** 4 **Assessment** External

Subfield Technology

Domain Digital Technologies

Status Registered **Status date** 17 November 2011

Planned review date 31 December 2014 **Date version published** 17 November 2011

This achievement standard requires demonstrating understanding of advanced concepts from computer science.

Achievement Criteria

Achievement	Achievement with Merit	Achievement with Excellence
<ul style="list-style-type: none"> Demonstrate understanding of advanced concepts from computer science. 	<ul style="list-style-type: none"> Demonstrate in-depth understanding of advanced concepts from computer science. 	<ul style="list-style-type: none"> Demonstrate comprehensive understanding of advanced concepts from computer science.

Explanatory Notes

- 1 This achievement standard is derived from the Level 7 achievement objectives from the Technology learning area in *The New Zealand Curriculum*, Learning Media, Ministry of Education, 2007; and is related to the material in the *Teaching and Learning Guide for Technology*, Ministry of Education, 2010 at <http://seniorsecondary.tki.org.nz>.

Appropriate reference information is available in *Safety and Technology Education: A Guidance Manual for New Zealand Schools*, Learning Media, Ministry of Education, 1998; and the Health and Safety in Employment Act 1992.

Further information can be found at <http://www.techlink.org.nz>.

- 2 *Demonstrate understanding of advanced concepts from computer science* involves:
- describing ways in which different types of data can be represented using bits
 - describing the concept of encoding information using compression coding, error control coding, and encryption; and typical uses of encoded information
 - providing examples from human-computer interfaces that illustrate usability heuristics.

Demonstrate in-depth understanding of advanced concepts from computer science involves:

- comparing and contrasting different ways in which different types of data can be represented using bits and discussing the implications
- discussing how a widely used technology is enabled by one or more of compression coding, error control coding, and encryption
- evaluating a given human-computer interface in terms of usability heuristics.

Demonstrate comprehensive understanding of advanced concepts from computer science involves:

- evaluating a widely used system for compression coding, error control coding, or encryption
- suggesting improvements to a given human-computer interface based on an evaluation in terms of usability heuristics.

- 3 *Advanced concepts from computer science* are the concepts of data representations, encoding, and usability heuristics.

- 4 Data representations may include binary representations for signed and unsigned integers, real numbers, characters, text, colours, sound, and images.

- 5 Assessment Specifications for this achievement standard can be accessed through the Technology Resources page found at <http://www.nzqa.govt.nz/qualifications-standards/qualifications/ncea/ncea-subject-resources/>.

Quality Assurance

- 1 Providers and Industry Training Organisations must have been granted consent to assess by NZQA before they can register credits from assessment against achievement standards.
- 2 Organisations with consent to assess and Industry Training Organisations assessing against achievement standards must engage with the moderation system that applies to those achievement standards.
