

Achievement Standard

Subject Reference	Earth and Space Science 3.5		
Title	Demonstrate understanding of processes in the atmosphere system		
Level	3	Credits	4
		Assessment	External
Subfield	Science		
Domain	Earth and Space Science		
Status	Registered	Status date	04 December 2012
Planned review date	31 December 2016	Date version published	04 December 2012

This achievement standard involves demonstrating understanding of processes in the atmosphere system.

Achievement Criteria

Achievement	Achievement with Merit	Achievement with Excellence
<ul style="list-style-type: none"> • Demonstrate understanding of processes in the atmosphere system. 	<ul style="list-style-type: none"> • Demonstrate in-depth understanding of processes in the atmosphere system. 	<ul style="list-style-type: none"> • Demonstrate comprehensive understanding of processes in the atmosphere system.

Explanatory Notes

- 1 This achievement standard is derived from *The New Zealand Curriculum*, Learning Media, Ministry of Education, 2007, Level 8, and is related to the material in the *Teaching and Learning Guide for Earth and Space Science*, Ministry of Education, 2010 at <http://seniorsecondary.tki.org.nz>. The standard is aligned to the Earth systems and Interacting systems achievement objective of the Planet Earth and Beyond strand.

- 2 *Demonstrate understanding* involves:
 - explaining processes and links within the processes in the atmosphere system.
Demonstrate in-depth understanding involves:
 - explaining links between the processes in the atmosphere system.
Demonstrate comprehensive understanding involves:
 - discussing the complexity of the atmosphere system.

- 3 *Processes in the atmosphere system* will be selected from:
- atmosphere composition – gases, aerosols including clouds, gradients, temperature, pressure, density
 - atmospheric circulation
 - convection cells - Hadley, Ferrel, Polar
 - wind belts - Trade, Westerlies, Polar Easterlies, Doldrums
 - Coriolis effect
 - transport of matter and heat energy – water, gases, aerosols from volcanic eruptions
 - cycles – water, carbon; biological pump and physical pump
 - climate – global and regional trends – temperature, precipitation, weather.
- 4 Assessment Specifications for this achievement standard can be found at <http://www.nzqa.govt.nz/qualifications-standards/qualifications/ncea/subjects/>.
-

Quality Assurance

- 1 Providers and Industry Training Organisations must have been granted consent to assess by NZQA before they can register credits from assessment against achievement standards.
- 2 Organisations with consent to assess and Industry Training Organisations assessing against achievement standards must engage with the moderation system that applies to those achievement standards.

Consent and Moderation Requirements (CMR) reference
