

Achievement Standard

Subject Reference Health 2.2

Title Evaluate factors that influence people's ability to manage change

Level 2 **Credits** 5 **Assessment** Internal

Subfield Health and Physical Education

Domain Health Education

Status Registered **Status date** 17 November 2011

Planned review date 31 December 2019 **Date version published** 20 November 2014

This achievement standard involves the evaluation of factors that influence people's ability to manage change.

Achievement Criteria

Achievement	Achievement with Merit	Achievement with Excellence
<ul style="list-style-type: none"> Evaluate factors that influence people's ability to manage change. 	<ul style="list-style-type: none"> Evaluate in depth, factors that influence people's ability to manage change. 	<ul style="list-style-type: none"> Evaluate comprehensively, factors that influence people's ability to manage change.

Explanatory Notes

- 1 This achievement standard is derived from the Health and Physical Education learning area in *The New Zealand Curriculum*, Learning Media, Ministry of Education, 2007; Level 7 achievement objectives (relevant to the context used); and is related to the material in the *Teaching and Learning Guide for Health and Physical Education*, Ministry of Education, 2010 at <http://seniorsecondary.tki.org.nz>.

Assessment will be consistent with and reflect the underlying concepts (Hauora, socio-ecological perspective, health promotion, attitudes and values) of the Health and Physical Education learning area in *The New Zealand Curriculum*, page 22.

This standard is also derived from Te Marautanga o Aotearoa. For details of Te Marautanga o Aotearoa achievement objectives to which this standard relates, see the [Papa Whakaako](#) for the relevant learning area.

- 2 *Evaluate factors that influence people's ability to manage change* involves:
- explaining risk and protective factors that contribute to people's ability to manage change situations

- recommending a combination of personal, interpersonal and societal strategies to maintain the protective factors and/or minimise the risk factors.

Evaluate in depth, factors that influence people's ability to manage change involves:

- explaining, in detail, risk and protective factors that are clearly linked to the change situations
- recommending personal, interpersonal and societal strategies specific to the change situations.

Evaluate comprehensively, factors that influence people's ability to manage change involves providing an explanation that demonstrates critical understandings of:

- the risk and protective factors influencing people's ability to manage change situations
- strategies for maintaining the protective factors and minimising the risk factors.

Critical understandings will be shown, for example, through a relevant combination of:

- showing a conceptually sound understanding of the concept of resilience in relation to the change situation
- showing insight into the change situation beyond the immediate evidence (eg by drawing on understandings from similar situations)
- showing understanding of how a major life change results in many inter-related changes
- linking the risk and protective factors to the relevant determinants of health
- explaining interrelationships between the personal, interpersonal and societal factors influencing people's ability to cope with change, or the strategies for building resilience.

- 3 Risk and protective factors, and strategies for managing change are related to the concept of resilience.
- 4 The context for the assessment will be based on a significant change situation related to the key learning area of mental health. A significant change situation results in numerous changes that need to be considered as part of the evaluation. Situations may include aspects of:
- physical or mental health problems, eg illness, disability
 - family separation, or relationship break up
 - changing house, school, and/or country
 - significant loss situations resulting in grief
 - drug use and misuse
 - experiencing significant failure, eg at school
 - repeated or ongoing pressured, risky, or stressful life situations at home, work or in the social environment.
- Focusing on suicide or eating disorders is not appropriate.
- 5 Conditions of Assessment related to this achievement standard can be found at <http://ncea.tki.org.nz/Resources-for-Internally-Assessed-Achievement-Standards>.

Replacement Information

This achievement standard replaced AS90327 and unit standard 4258.

Quality Assurance

- 1 Providers and Industry Training Organisations must have been granted consent to assess by NZQA before they can register credits from assessment against achievement standards.
- 2 Organisations with consent to assess and Industry Training Organisations assessing against achievement standards must engage with the moderation system that applies to those achievement standards.
