Appropriate reference information is available in *Safety and Technology Education: A Guidance Manual for New Zealand Schools*, Ministry of Education at <http://technology.tki.org.nz/Curriculum-support/Safety-and-Technology-Education>, and the Health and Safety at Work Act 2015.

This standard is also derived from *Te Marautanga o Aotearoa*. For details of *Te Marautanga o Aotearoa* achievement objectives to which this standard relates, see the [Papa Whakaako](#) for the relevant learning area.

- 2 *Undertake project management to support technological practice* involves:
- establishing a project schedule reflective of the physical and social environment where the outcome is to be developed and implemented, informed by existing practices in project management
 - implementing the project schedule to coordinate goals, planning tools, resources, and progress review points in a coherent manner to ensure completion of an outcome.

Undertake effective project management to support technological practice involves:

- demonstrating project scheduling informed by a critical analysis of existing practices in project management
- reviewing progress at critical review points to revise and/or confirm project scheduling to ensure completion of an outcome.

Undertake efficient project management to support technological practice involves:

- optimising time and material use to ensure completion of an outcome, through ongoing reflection of the practice undertaken, and revision of project scheduling.

- 3 Existing practices in project management may include those used by past students, managers, industry mentors and practising technologists.

- 4 *Project management* ensures that all aspects of development are coordinated to effectively manage resources within the physical and social environment where the outcome is to be developed.

- 5 Resources may include: time, materials, tools and equipment, research information, stakeholders and specialist knowledge and skills residing in community and school experts.

- 6 *Technological practice* is undertaken to develop an outcome. An outcome for the purpose of this standard is a conceptual design for an outcome and/or a technological outcome itself (prototype).
