- Evaluate* involves explaining how and why strategies are applied and, using ongoing reflection, explaining how the strategies contribute to the effective functioning of the group in a physical activity context.

Evaluate, in-depth, involves providing explanations, based on careful consideration and investigation, of the impact of the strategies on the group, using ongoing reflection and making appropriate adaptations where necessary.

Evaluate comprehensively involves making judgements about the application of the strategies in relation to the effective functioning of the group with the aim of using ongoing reflection and making appropriate adaptations where necessary. Judgements are coherent and show some insight.
