Resource B: Colonisation and the Health of Indigenous People**Indigenous populations**

There are an estimated 370 million indigenous peoples living in more than 70 countries worldwide.

The health status of indigenous peoples varies significantly from that of non-indigenous population groups in countries all over the world.

Colonisation

Colonisation is the forming of a settlement or colony by a group of people who seek to take control of territories or countries.

- the removal of tribal land so that nomadic tribes could no longer travel the land.
