Level 3 Health, 2019

91462 Analyse an international health issue

9.30 a.m. Monday 25 November 2019

Credits: Five

Achievement	Achievement with Merit	Achievement with Excellence
Analyse an international health issue.	Analyse, in depth, an international health issue.	Analyse, perceptively, an international health issue.

Check that the National Student Number (NSN) on your admission slip is the same as the number at the top of this page.

You should attempt ALL parts of the question in this booklet.

If you need more room for any answer, use the extra space provided at the back of this booklet.

Check that this booklet has pages 2–12 in the correct order and that none of these pages is blank.

YOU MUST HAND THIS BOOKLET TO THE SUPERVISOR AT THE END OF THE EXAMINATION.

TOTAL

ASSESSOR'S USE ONLY

INSTRUCTIONS

Select ONE of the two topics about an international health issue below, and use your chosen topic to answer ALL parts of the question.

An international health issue is one currently affecting the well-being of a significant number of people in a country (or countries) other than, or as well as, New Zealand and which is a matter of public concern.

Before you begin, read through all parts of the question. Support your answers with specific and relevant evidence, such as examples, quotations and/or data from credible and current sources (2014 and after).

International health topics:

Tick ONE (✓)

TOPIC A – Disease in the Pacific or Asia/Pacific region.

TOPIC B – Globalisation and risks to health in relation to nutrition.

Details from within your selected topic:

Location: _____

Disease: _____

The two most significant and relevant determinants of health (DOH) affecting the issue are:

DOH (1): _____

DOH (2): _____

Two local strategies to address the issue are:

Local strategy (1): _____

Local strategy (2): _____

PLANNING (OPTIONAL)ASSESSOR'S
USE ONLY

Significant and relevant determinants of health → How each determinant contributes to issue → Implications for well-being → Strategies for more equitable outcomes

This page has been deliberately left blank.

- (d) Recommend TWO **local** strategies that would help to address the determinants of health in (b), and their consequent impacts on well-being in (c).

Explain how EACH strategy would bring about more equitable outcomes for those directly and indirectly affected by your health issue, supporting your answer with detailed evidence.

Note: A local strategy is one that includes actions that involve only the community or country where the disease is causing an issue.

Extra space if required.
Write the question number(s) if applicable.
