SCENARIOS

Sam and Trinity's Scenarios (below) are also available on page 2 and 6 of the question booklet.

Sam's Scenario

Sam is in Year 13 at the local high school and is working towards gaining NCEA Level 3 and University Entrance so that he can study for a Bachelor of Design at university. Sam is fortunate enough to have his full driver's licence and was given a car for his 18th birthday.

On Friday, Sam is bored so decides to skip last period and drive down to the local park with his friends, Hollie and Simon. Their friend Trinity is running late, but said she will meet them at the park as it's not far away. When they get there, they notice that there are several mums with small children playing on the local playground. Simon suggests to the others that instead of smoking a joint of cannabis under the trees, they should go back to Sam's car, so they don't get recognised by their school uniforms. The friends get into the car and Simon shares the joint around. Sam, Simon and Hollie all smoke the cannabis. After sharing the joint around, the friends notice that the car is full of smoke and that their eyes have all gone red.

Trinity's Scenario

Trinity arrives in the park and notices the group are sitting in a cloud of smoke in Sam's car. She goes towards the car and knocks on the window. Simon asks her if she would like to jump in and share the joint. Trinity has a difficult decision to make. She does not want to smoke cannabis as she has netball trials after school and thinks it might affect her chances of getting in the top team. On the other hand, she does not want to let her friends down or be teased or excluded for not trying it.
