91934 Demonstrate understanding of how natural processes shape an environment

Credits: Five

SAMPLE ASSESSMENT

ASSESSMENT TASK

Achievement	Achievement with Merit	Achievement with Excellence
Demonstrate understanding of how natural processes shape an environment.	Explain how natural processes shape an environment.	Examine how natural processes shape an environment.

SAMPLE ASSESSMENT TASK

Use a case study environment you have studied this year to answer Part B.

PART A

- (i) Produce a map or photograph of an environment which has similar phenomena to your case study.

Note this map or photograph may be hand-drawn or digital but should be independently sourced and not provided by your teacher.

- (ii) Name TWO processes that would have operated to shape the environment shown in your map or photograph.
- (iii) Annotate the map or photograph to explain how the phenomena have been shaped by the natural processes you named in part (ii).

PART B

- (iv) Explain the influence that the phenomena of your case study environment have had on the location of TWO types of cultural features.

Cultural features can include but are not limited to:

- Transport routes (roads, railways, ports, etc.)
- Buildings (houses, shops, marae, etc.)
- Land use (agriculture, industry, residential, etc.)
- Infrastructure (power, water, sewerage, etc.)

In your answer include case study evidence and geographic terminology.

- (v) Examine the implications that the natural processes in your case study environment may have on people in the future.

In your answer include case study evidence and geographic terminology.
