

**Assessment Schedule – 2022****Health: Analyse an international health issue (91462)****Assessment Criteria**

Achievement	Achievement with Merit	Achievement with Excellence
The candidate analyses a significant health issue of international concern.		
<p><i>Analysis</i> involves a critical perspective through:</p> <ul style="list-style-type: none"> <li>• explaining why the health issue is of international concern, and covering the implications for the well-being of people and society</li> <li>• explaining how major determinants of health influence the named issue</li> <li>• recommending strategies to bring about more equitable outcomes in relation to the named health issue.</li> </ul> <p>The analysis is supported by <b>evidence</b> which may include examples, quotations, and / or data from the resource booklet or other credible and current sources.</p>	<p><i>In-depth analysis</i> involves a critical perspective through:</p> <ul style="list-style-type: none"> <li>• recommending strategies for addressing the health issue in a way that takes into account:               <ul style="list-style-type: none"> <li>- the influence of the major determinants of health</li> <li>- the impact of the major determinants of health on well-being.</li> </ul> </li> </ul> <p>The analysis is supported by <b>detailed evidence</b> which may include examples, quotations, and / or data from the resource booklet or other credible and current sources.</p>	<p><i>Perceptive analysis</i> involves a critical perspective through:</p> <ul style="list-style-type: none"> <li>• recommending strategies based on a coherent explanation that connects the health issue and the influence of the major determinants of health on the issue to the underlying health concepts (hauora, socio-ecological perspective, health promotion, and attitudes and values).</li> </ul> <p>The analysis is supported by <b>coherent and concise evidence</b>, which is logical and credible. This may include examples, quotations, and / or data from the resource booklet or other credible and current sources.</p>

## Sample Evidence

Question	Sample Evidence
(a)	<p><i>Possible evidence for malnutrition in Timor-Leste being an international health concern:</i></p> <p>Access to adequate food that nourishes is a human right that numerous people in Timor-Leste do not have. The lack of nutrition has ramifications for health and well-being for substantial numbers of people within Timor-Leste. The lack of sustenance means that people are not able to have quality of life nor fulfil their obligations to helping Timor-Leste out of poverty by being employed and raising productivity within the country.</p>
(b) (i) and (ii)	<p><i>Possible evidence explaining how malnutrition in Timor-Leste is shaped by one major determinant of health, AND how this impacts the well-being of people who are directly affected by malnutrition.</i></p> <p><b>Major determinant of health: Political</b></p> <p>Government policy needs to ensure that nutrition is a focus for Timor-Leste. At present, there are not adequate policies to prioritise education or training incentives to teach agricultural techniques to people. This would teach people to grow crops and provide foods that can yield the highest nutritional value possible, and have good financial yields at market. It means that the people of Timor-Leste are not receiving adequate nutrition when there is land that could be producing yields that would help. The physical well-being of people within Timor-Leste is severely impacted by the inadequate nutrition, which results in stunting in children, and low energy levels.</p>
(iii)	<p><i>Possible evidence recommending one strategy to improve the well-being of people who are directly affected by malnutrition in Timor-Leste (with reference to addressing the determinant of health identified in (b) (i)):</i></p> <p>Government policy to ensure that nutrition is a focus for Timor-Leste will influence the well-being of its people. This could be implemented by the Government reprioritising their budgets to provide training for parents and farmer groups in improved agricultural techniques. This will encourage more superfood production. Providing children in Timor-Leste with access to adequate nutrition means they will not be affected by the stunting that can be seen in large numbers across the country. This would alleviate the number of children affected by acute malnutrition in Timor-Leste.</p>
(c) (i) and (ii)	<p><i>Possible evidence explaining how malnutrition in Timor-Leste is shaped by one major determinant of health, AND how this impacts the well-being of people and communities who are affected by malnutrition.</i></p> <p><b>Major determinant of health: Economic</b></p> <p>The level of poverty within Timor-Leste is a major reason why there is malnutrition in Timor-Leste. An inability to sustain food for families is the major contributor to poor health outcomes for all the population of Timor-Leste, but particularly for children whose bodies are still growing. More than half of the people of Timor-Leste live below the poverty line. This means parents cannot provide adequate food for their families. This has massive ramifications in relation to poor nutrition, which then leads on to other health implications, such as poor brain and bone development, which both have long lasting effects. This affects individuals that are directly involved, as they cannot fulfil their potential in relation to learning, gaining employment, and the skills to provide for their families. It also affects society as a whole, because the productivity of the country is reduced.</p>
(iii)	<p><i>Possible evidence recommending one strategy to improve the well-being of people and communities who are affected by malnutrition in Timor-Leste (with reference to addressing the determinant of health identified in (c) (i)):</i></p> <p>Support from Global organisations such as World Vision and Oxfam, working together with the Timor-Leste Government to access funding for emergency nutrition assistance. This would provide ready-to-use therapeutic foods, which treat children suffering from malnutrition.</p>
Other responses possible.	

<b>N1</b>	<b>N2</b>	<b>A3</b>	<b>A4</b>	<b>M5</b>	<b>M6</b>	<b>E7</b>	<b>E8</b>
Partial answer, but does not analyse the health issue.	Insufficient evidence to meet the requirements for Achievement.	<p>All responses at Achievement level.</p> <p>The analysis generally meets the requirements for Achievement, but the quality may be inconsistent.</p>	<p>All responses at Achievement level.</p> <p>The analysis consistently meets the requirements for Achievement.</p>	<p>The response fulfils the intent of the assessment criteria for Achievement with Merit.</p> <p>The in-depth analysis meets the requirements for Merit, but some aspects of the answer may be inconsistent.</p>	<p>The response fulfils the intent of the assessment criteria for Achievement with Merit.</p> <p>The in-depth analysis consistently meets the requirements for Merit.</p>	<p>Most responses at Excellence level.</p> <p>The perceptive analysis meets the requirements for Excellence, but one aspect of the answer may be inconsistent.</p>	<p>The response fulfils the intent of the assessment criteria for Achievement with Excellence.</p> <p>The perceptive analysis meets the requirements for Excellence.</p>
<b>N0</b> = No response; no relevant evidence.		Some supporting evidence is provided.	Supporting evidence is provided.	Some detailed supporting evidence is provided.	Detailed supporting evidence is provided.	Consistent and coherent evidence is provided.	Consistent and coherent evidence is provided throughout.
