

## Assessment Schedule – 2023

### Social Studies: Demonstrate understanding of how ideologies shape society (91598)

#### Assessment Criteria

Achievement	Achievement with Merit	Achievement with Excellence
<p><i>Demonstrate understanding</i> involves using <b>social studies concepts</b> and giving <b>specific evidence</b> to describe:</p> <ul style="list-style-type: none"> <li>ideologies within a specific society</li> <li>change(s) shaped by these ideologies and through social processes</li> <li>the points of view, values, and perspectives of different individuals and / or groups in relation to the change(s).</li> </ul>	<p><i>Demonstrate in-depth understanding</i> involves:</p> <ul style="list-style-type: none"> <li>explaining how and / or why these ideologies have shaped the society through social processes.</li> </ul>	<p><i>Demonstrate comprehensive understanding</i> involves:</p> <ul style="list-style-type: none"> <li>evaluating the extent to which the ideologies have shaped society.</li> </ul>

#### Evidence

A3	A4	M5	M6	E7	E8
<p>Gives a limited, imbalanced, or partial description of TWO ideologies that have influenced the future of medicine in society, by including:</p> <ul style="list-style-type: none"> <li>change(s) influenced by these ideologies and social processes</li> <li>points of view, with associated values and perspectives of the individuals / groups involved.</li> </ul> <p>Includes some specific evidence from the resources and uses social studies concepts.</p>	<p>Describes TWO ideologies that have influenced the future of medicine in society, as well as:</p> <ul style="list-style-type: none"> <li>changes influenced by these ideologies and social processes</li> <li>at least TWO differing points of view, with associated values and perspectives of the individuals / groups involved, in relation to the changes.</li> </ul> <p>Includes specific evidence from the resources and uses social studies concepts.</p>	<p>Gives a partial or limited explanation of how and / or why the ideologies involved have influenced the future of medicine in society:</p> <ul style="list-style-type: none"> <li>through a social process</li> <li>by including the differing points of view, values, and perspectives of the individuals / groups involved.</li> </ul> <p>Includes specific and relevant evidence from the resources and uses social studies concepts.</p>	<p>Explains how and / or why the ideologies have influenced the future of medicine in society:</p> <ul style="list-style-type: none"> <li>through a social process</li> <li>by including the differing points of view, values, and perspectives of the individuals / groups involved.</li> </ul> <p>Includes specific and relevant evidence from the resources and uses social studies concepts.</p>	<p>Gives a partial or limited evaluation of which ideology has influenced the future of medicine in society the most and why.</p> <p>Includes specific and relevant evidence from the resources consistently and uses social studies concepts.</p>	<p>Evaluates comprehensively which ideology has influenced the future of medicine in society the most and why.</p> <p>Includes specific and relevant evidence from the resources consistently and uses social studies concepts.</p>
<p>See <b>Appendix</b> for sample evidence.</p> <p><b>N2</b> = Attempts to describe how an ideology has influenced the future of medicine in society.  <b>N1</b> = Attempts a relevant response for an aspect(s) of the task (may be a sentence or two).  <b>N0</b> = No response; no relevant evidence.</p>					

#### Cut Scores

Not Achieved	Achievement	Achievement with Merit	Achievement with Excellence
0 – 2	3 – 4	5 – 6	7 – 8

**Appendix – Sample Evidence**

<b>Task</b>		
<b>Expected Coverage (not limited to these examples)</b>		
<b>Achievement</b>	<b>Achievement with Merit</b>	<b>Achievement with Excellence</b>
<p>Explains <i>how and / or why</i> TWO ideologies have influenced the future of medicine in society. Which ideology has influenced the future of medicine in society the most and why. Includes the points of view, values, and perspectives of the different individuals / groups involved and at least ONE social process.</p> <p>When looking ahead to the next 25 years, medicine is set to bring huge changes to civilisation. The ideology of egalitarianism (equality and equal treatment across gender, religion, economic status, and political beliefs) can be seen in Dr Rachel Mackie’s perspective about medicine for Māori in Aotearoa New Zealand, where she explains that equity is a major health concern for Māori, who are generally worse off because not enough is being done to meet their health needs. Mackie values indigenous rights, and, when looking to the future of medicine, has been raising concerns about the inequity she has seen for Māori in medicine, but feels this is not being addressed effectively yet. However, the new national health system, which is nationally planned, regionally delivered, and locally tailored, should help to allow communities to evolve their practices to address their communities’ needs. Another ideology that has influenced the future of medicine in society is technological utopianism. This can be seen in many ways, including technologies that have been created to improve outcomes in the medical world for doctors and patients. Specifically, smart devices will provide insights into everyday life that once would have been discovered only through blood tests and monitoring. Smart devices can support people in avoiding and preventing suffering from conditions that would otherwise have needed monitoring, which creates an ideal living standard and demonstrates techno-utopianism.</p>	<p>The way that egalitarianism has / will shape the future of medicine is shown in the way that individuals / groups / businesses make decisions to embrace where medicine is heading. The medical community is progressively introducing and incorporating new technologies, such as smart watches, artificial intelligence, and virtual reality. Robert M. Wachter suggests that the new technology can be of benefit to patients because it democratizes healthcare, giving access to new tools and information. Evolving community practices in Aotearoa New Zealand will mean that patients have access to new tools and information. Wachter believes that this will be transformative for patients and their communities.</p>	<p>Cell and gene therapy has the potential to prevent and / or cure diseases, including the growing number of rare diseases. The ideology that has the most influence on the future of medicine is egalitarianism because of all these new advances in technology. As Professor Yáñez-Muñoz says, “It’s no longer just about hope, but now it’s a reality – with a growing number of rare diseases that can be effectively treated with these therapies ...” These new treatments in healthcare promote equality because they provide access to medical care for all people with diseases. With this in mind, Aotearoa New Zealand began using a new health system in July 2022, designed, and established to enable a whole-of-country view of planning and delivering services, in order to be more efficient and consistent. This shows that when thinking about the future of medicine, egalitarianism has the greatest influence because the progress that has been made provides the best outcomes for patients, improving health, livelihoods, and life expectancy.</p>
