Question Two

Suggested solution

This is an open-ended question, with the material from the resources providing the initial point of reference. The key in the discussion is how the accounting profession's fundamental ethical standards of integrity, professionalism, duty of care, confidentiality, and competency should evolve in an AI-enabled world. The question requires candidates to examine the potential impacts of AI on society, business, regulators, and individuals.

Judgment

	Score	
Outstanding scholarship	7, 8	<p>Draws on the resource material and produces and effectively communicates an outstanding and sophisticated analysis that demonstrates a high level of perception and insight in their discussion of how the accounting profession's fundamental ethical standards of integrity, professionalism, duty of care, confidentiality, and competency should evolve in an AI-enabled world. Each of society, business, regulators, and individuals should be considered.</p> <p>AND</p> <p>Demonstrates sophisticated abstraction and integration of the resource material.</p> <p>AND</p> <p>Demonstrates a high degree of critical thinking and analysis, carefully articulating how the accounting profession's fundamental ethical standards could evolve to assuage the concerns of society, business, regulators, and individuals in the face of an AI-enabled world.</p> <p>AND</p> <p>Demonstrates independent reflection and extrapolation relevant to the evaluation of the resource material.</p> <p>AND</p> <p>Provides evidence of convincing communication. Answers are planned, succinct, and clearly articulated.</p> <p>(For 7 not to the same level as above.)</p>
Scholarship	5, 6	<p>Draws on the resource material and produces and effectively communicates an outstanding and sophisticated analysis that demonstrates a high level of perception and insight in their discussion of how the accounting profession's fundamental ethical standards of integrity, professionalism, duty of care, confidentiality, and competency should evolve in an AI-enabled world. At least THREE of society, business, regulators, and individuals should be considered for a 6 to be awarded.</p> <p>AND</p> <p>Demonstrates a high level of analysis and critical thinking but not quite the depth of analysis necessary to reach the level required for Outstanding Scholarship.</p> <p>AND</p> <p>Incorporates a competent level of integration and synthesis of the resource material.</p> <p>AND</p> <p>The discussion and evaluation are clear, logically developed, and precise.</p>

Below Scholarship	3, 4	<p>Produces a sound discussion of how the accounting profession's fundamental ethical standards of integrity, professionalism, duty of care, confidentiality, and competency should evolve in an AI-enabled world. At least TWO of society, business, regulators, and individuals should be considered for a 4 to be awarded.</p> <p>AND</p> <p>Produces a clear but unsupported discussion and evaluation.</p> <p>AND</p> <p>Demonstrates some level of integration and synthesis of the resource material.</p> <p>AND</p> <p>Demonstrates some application of the resources but is largely descriptive with insufficient evidence of independent analysis and evaluation.</p> <p>AND</p> <p>Shows little evidence of planning, very descriptive, and may merely regurgitate the material provided in the resources.</p> <p>AND</p> <p>Critical thinking is limited or not evident.</p>

Question Three

Suggested solution

The contribution margin ratio assists the managers of *Mighty Tanks Limited* to calculate and set sales targets for water tanks. If *Mighty Tanks Limited* only produced and sold one water tank for \$6 500, fixed costs of \$6 900 000 would still need to be paid. Variable costs (direct labour, material, and variable overheads), amount to \$19 507 500 (\$8 550 000 + \$9 405 000 + \$1 552 500), giving a unit contribution margin of \$2 165. This provides a contribution margin ratio of $\$2\,165 \div \$6\,500 = 33.308\%$. This means that 33.31% from the sale of each water tank is available to contribute towards the \$6 900 000 fixed costs *Mighty Tanks Limited* needs to cover annually and to help achieve the profit target.

$$\begin{aligned}
 \text{Break-even units} &= \frac{\text{Fixed costs}}{\text{Unit contribution margin}} \\
 &= \frac{6\,900\,000}{\$2\,165 [\$6\,500 - \$4\,335 ((\$26\,407\,500 - \$6\,900\,000)/4\,500)]} \\
 &= \frac{3\,187}{1} \\
 \text{Break-even \$} &= 3\,187 \times \$6\,500 \\
 &= \$20\,715\,500
 \end{aligned}$$

A margin of safety may be calculated. This reflects the amount of sales over a company's break-even point, i.e. the amount sales can decrease before a company starts to lose money or stops making a profit. The margin of safety is used to establish the risk of loss a business may be subjected to by changes in sales.

$$\begin{aligned}
 \text{Margin of safety} &= \frac{\text{Sales units} - \text{break-even units} \times 100}{\text{Sales units}} \\
 &= \frac{4\,500 - 3\,187 \times 100}{4\,500} \\
 &= \frac{29.18\%}{1}
 \end{aligned}$$

The managers of *Mighty Tanks Limited* are particularly interested in calculating the number of water tanks that would need to be sold to achieve performance expectations. From the comparative income statement, the budgeted operating profit amounted to \$2 842 500. The calculation for the number of sales units to meet performance expectations of \$3 806 000 is as follows.

$$\begin{aligned}
 \text{Sales volume} &= \frac{\text{Fixed costs} + \text{profit}}{\text{Unit contribution margin}} \\
 &= \frac{6\,900\,000 + 3\,806\,000}{2\,165} \\
 &= 4\,945 \text{ (4 945.03)}
 \end{aligned}$$

Mighty Tanks Limited would need to sell 4 945 units of the unmodified water tanks to meet the performance expectations. This is 445 additional tanks. However, it is questionable whether this is achievable with the new tanks. Candidates to examine factors here.

If *Mighty Tanks Limited* modifies the manufacturing of the water tanks but does not increase the selling price, the position is as follows:

Increase in material cost (variable) $(\$920 - \$680) = \$240$ $[\$9405\ 000 \div 4500] = (\$2090 + \$240) = \$2\ 330$

Increase in fixed cost wages $(\$8\ 550\ 000 \div 4500) = \$1\ 900 \times 1.15) = \$2\ 185$

Variable costs $1\ 552\ 500 \div 4500 = \345

Total variable costs per unit $(\$2330 + \$2\ 185 + \$345) = \4860

Increase in fixed cost – depreciation $(\$4\ 500\ 000 \div 10) = \$450\ 000$

The new break-even point can be calculated as follows:

$$\begin{aligned} \text{Break-even units} &= \frac{\text{Fixed costs}}{\text{Unit contribution margin}} \\ &= \frac{\$7\ 350\ 000 (\$6\ 900\ 000 + \$450\ 000)}{\$1\ 640 [\$6\ 500 - \$4\ 860]} \\ &= \frac{4\ 482 (4\ 481.7)}{} \\ \text{Break-even \$} &= 4\ 482 \times \$6\ 500 \\ &= \underline{\underline{\$29\ 133\ 000}} \end{aligned}$$

If sales price does not increase, the break-even in units increases from 3 187 to 4 482, an increase of 1 295 units. This may require a great effort on the part of the managers. If the managers of *Mighty Tanks Limited* wished to achieve the performance profit, they would need to sell without an increase in price the following number of improved tanks:

$$\begin{aligned} \text{Sales volume units} &= \frac{\text{Fixed costs} + \text{profit}}{\text{Unit contribution margin}} \\ &= \frac{7\ 350\ 000 + 3\ 806\ 000}{1\ 640} \\ &= \underline{\underline{6\ 803 (6802.44) \$44\ 219\ 500}} \end{aligned}$$

This appears unlikely given that the expected number of sales is 5 200 units. To achieve this increased target of 6 803 tanks, the managers of *Mighty Tanks Limited* would need to spend on an advertising campaign or hire additional sales representatives, which would increase fixed and perhaps variable costs if sales commission is paid.

Assuming the managers of *Mighty Tanks Limited* look to adjust the selling price on sales of 5 200 tanks, to achieve performance sales of \$44 219 500, a selling price of \$7 006 would need to be set.

Candidates to consider whether either of the above is feasible.

Calculating budgeted operating profit	NZ\$	NZ\$
Sales units	4 500	5 200
Sales	29 250 000	33 800 000
Direct costs		
Labour	(8 550 000)	(11 362 000)
Materials	(9 405 000)	(12 116 000)
Indirect costs		
Variable overhead	(1 552 500)	(1 794 000)
Fixed overhead	(6 900 000)	(7 350 000)
	<u>(26 407 500)</u>	<u>(32 622 000)</u>
Operating profit	<u>2 842 500</u>	<u>1 178 000</u>

$$[\$8\,550\,000 \div 4\,500] \times 1.15 \times 5\,200 = \$11\,362\,000$$

$$([\$9\,405\,000 \div 4\,500] - 680 + 920) \times 5\,200 = \$12\,116\,000$$

$$\$1\,552\,500 \div 4\,500 \times 5\,200 = \$1\,794\,000$$

Judgment

These candidates could generally not calculate the incremental revenue.</p> <p>AND</p> <p>Limited evidence of critical thinking.</p> <p>(For 3, had limited understanding of management decision-making. These candidates could generally not calculate the incremental revenue.)</p>
	2	Limited understanding relevant to the question. Some information is recalled, but ideas are not explained or analysed.
	1	The answer contains a minimal amount of relevant evidence.
	0	No response. No relevant evidence.

Question Four

Suggested solution

- Only those items that meet the definition of asset should be included in the statement of financial position.
- Do the two items listed meet the definition of an asset?
- An asset is a present economic resource controlled by the entity as a result of past events.
- What can we take from the definition?
- *Earthwormers Limited* has a number of economic resources that it controls, which provide it with certain rights. These rights arose through a purchase, or signing of a contract, and *Earthwormers Limited* has the control over the contracts and use of the website.
- The rights arose as a result of past events. The past event was the signing of the contracts and website development.
- *Earthwormers Limited* has rights that have the potential to produce economic benefits. There is the expectation that assets will be used to generate economic benefits in the form of sales / cash that will flow to *Earthwormers Limited*.
- The three elements of the definition appear to be met so the entry to recognise the three separate assets on the 30 June 2024 is correct.
- However, to recognise the asset in the statement of financial position at 30 June 2024, your friend needs to make a judgment that the disclosure of the asset will provide information that is both relevant and representationally faithful to the bank.
- Two factors to consider in determining whether information disclosed by an asset is relevant are:
 - existence uncertainty
 - probability associated with the expected inflow of economic benefits.
- *Earthwormers Limited* has a clear right to the contracts and website so there is no existence uncertainty.
- However, there is a high degree of measurement uncertainty associated with the inflow of economic benefits. Information about the contracts and website might therefore not be relevant to the users of the financial statements.
 - Given that it would be difficult in the circumstances to attribute a value that faithfully represents the value of the contracts and website, coupled with the measurement uncertainty that undermines faithful representation, it is not appropriate to recognise these items in the statement of financial position.
 - Excluding the contracts and website from the statement of financial performance is the most appropriate action to take in this case.

Judgment
