Assessment Schedule – 2025

Design and Visual Communication: Produce instrumental perspective projection drawings to communicate design ideas (91339)

Achievement Criteria

Achievement	Achievement with Merit	Achievement with Excellence
*Produce instrumental perspective projection drawings to **communicate** design ideas.*	*Produce instrumental perspective projection drawings to **clearly communicate** design ideas.*	*Produce instrumental perspective projection drawings to **effectively communicate** design ideas.*

Evidence

Not Achieved	Achievement	Merit	Excellence
Techniques/set up of perspective drawing are not applied.	Use **perspective drawing techniques** to show **design features** applying appropriate method(s).	**Accurate** use of perspective drawing techniques to show the **detail** of the design features.	Select a **viewpoint** that enables the detail of the design features to be shown **effectively**.
	Perspective drawing techniques are applied correctly: • SP identified • VPs projected correctly • GL, ELL, PP identified • plan view shown • elevations/heights indicated and used.	**Accurate** use of perspective drawing techniques applied correctly include: • correct perspective set up including the HL • understanding of how to use HL demonstrated.	Techniques/conventions of perspective drawing applied **effectively** and accurately shows the **viewpoint** (direction design is seen from) and a perspective set up (size the design is drawn) that enhances the key details/features of the design to be viewed.
Perspective drawings do not reveal any design details. Design ideas are not student generated (e.g. replicated from a class exercise).	Perspective drawings reveal **design features** shown but lack depth. • Detailing of design features could include windows, door handles, reliefs, fittings.	Perspective projections are drawn to reveal the **detailing** of design features (e.g. shows depth of features and/or materials that enhance the 3D nature of the design).	

Note: SP (Station Point); VPs (Vanishing Points); GL (Ground Line); ELL (Eye Level Line); PP (Picture Plane); HL (Height Line).
