National secondary examinations timetable

Information relating to all achievement standards

Candidates are to produce a portfolio consisting of EITHER a two-panel portfolio (folio board) OR a moving image portfolio, representing the requirements of the standard. Schools then send sample portfolios to NZQA for verification. Panels of verifiers either confirm or adjust the provisional grades for the sample portfolios. These become the final grades for the sample portfolios. Schools are required to use the results of verification to award final grades to their remaining candidates.

Two-panel portfolio specifications

- The two-panel portfolio must be free-standing and consist of TWO 820 × 610 mm panels of cardboard, joined down the long edge (portrait in orientation).
- The two panels must be hinged with adhesive tape or a glued binding cloth, and fold inwards to ensure the artwork is not damaged.
- The portfolio should weigh no more than 1 kg and should be no more than 10 mm thick when folded.
- Three-dimensional work or large-scale work should be represented by good quality photographs and, where appropriate, be accompanied by sketches, headings, or diagrams.

- With photographs of artworks, the candidate should provide descriptive information about media and processes used, scale, and site.

Moving image portfolio specifications

- The body of work for a moving image portfolio should be equivalent to the body of work required for a two-panel portfolio.
- The portfolio should show evidence of actual time-based work and / or documentation of time-based art or design practice. A moving image portfolio is NOT merely a digital representation of a two-panel portfolio.
- The portfolio must be submitted as ONE video file no more than 120 seconds in total length. The portfolio may comprise several individually edited video files or a combination of moving and still images.
- Music or sound included in a moving image portfolio must be either an original composition(s) or music for which copyright has been obtained, and must be referenced in credits at the end of the submission.

Note: Digital submissions will not be returned to candidates.

Conditions of assessment

Candidates must not use appropriated imagery in their portfolio.

The use of chatbots, generative AI, paraphrasing tools, or other tools that can automatically generate content is not permitted and material generated by these tools should not be submitted as part of the candidate's work.

Authenticity

Teachers must closely supervise the process of evidence collection to ensure that candidates:

- do not copy from another person or source without appropriate acknowledgement
- do not receive guidance, scaffolding, instruction, assistance, or assessment conditions beyond what is specified as permissible in these Assessment Specifications.

Where a teacher cannot verify that the assessment submitted is the authentic work of the candidate, they must notify NZQA of a possible Candidate Breach of External Assessment.

Special Assessment Conditions

Refer to the NZQA website for further information.

Submission requirements

Digital evidence must be:

- submitted as ONE file
- permitted file types: video (AVI, M4V, MP4, MOV, WEBM)
- a maximum file size of 5GB.

Schools are required to store securely a backup copy (or originals) of all digital submissions.

Candidates should refer to [Further Guidance for Submission Responses](#) for further information.

Refer also to other resources on the [subject page](#) of NZQA website.

Further submission instructions and authenticity requirements will be provided for schools in Term 3.

Specific information for individual achievement standards

Standard:	91320
Domain:	Practical Art
Title:	Produce a systematic body of work that shows understanding of art making conventions and ideas within design
