Information relating to all achievement standards

To assist candidates, questions may be scaffolded. This scaffolding could mean that a question is broken into several parts and/or bullet points.

Questions in each standard may draw on specific examples from contemporary New Zealand contexts.

Equipment required

A ruler, for drawing graphs, and an [approved calculator](#) are required.

Specific information for individual achievement standards

Standard:	91399
Title:	Demonstrate understanding of the efficiency of market equilibrium
Version:	2
Number of credits:	4

The economic models assessed will be selected from:

- the supply and demand model for the goods and/or service markets
- internationally traded goods markets where New Zealand is a price taker.

Candidates may be required to demonstrate an understanding of elasticity concepts.

Standard: 91400
Title: Demonstrate understanding of the efficiency of different market structures using marginal analysis
Version: 2
Number of credits: 4

The economic models assessed will be selected from:

- the supply and demand model
- the cost and revenue model for a perfectly competitive firm and monopoly firm (including natural monopoly).

Standard: 91403
Title: Demonstrate understanding of macro-economic influences on the New Zealand economy
Version: 2
Number of credits: 6

The economic models assessed will be selected from:

- the business cycle
- the aggregate demand and aggregate supply model
- the spending multiplier
- the foreign exchange model
- the circular flow model.

Government policies assessed may include:

- monetary policy
- fiscal policy
- supply side policies
- international trade policies.
