National Certificate in Mathematics (Level 1)

Level 1

Credits 40

This qualification has been reviewed. The last date to meet the requirements is 31 December 2018.

Transition Arrangements

The last date for enrolment is 31 January 2017. People cannot be enrolled in programmes leading to the award of this qualification unless there is appropriate time available to them to complete the programme and be awarded the qualification before it expires.

For detailed information see Review Summaries on the NZQA website.

National Certificate in Mathematics (Level 1)

Level 1

Credits 40

Purpose

This national certificate recognises a range of basic mathematical skills that provide a foundation for further learning in mathematics and/or for any line of employment that requires the application of such skills.

At Level 1, candidates should be able to gain competency in mathematical skills which may lead to further study in mathematics or prepare candidates for work where maths skills are required. They will be able to:

- perform simple mathematical operations;
- use mathematical skills;
- use a problem-solving approach to mathematical problems or tasks.

and, depending on standard selection, they may be able to:

- perform income-related calculations;
- demonstrate knowledge of personal financial management;
- interpret and verify accuracy of personal financial documents.

This qualification recognises competency in mathematical skills which may lead to further study in mathematics or prepare candidates for work where the application of basic mathematical skills is required. The skills can be assessed in a range of meaningful contexts and the candidates will gain skills dependent upon standard selection in the elective sets.

The flexible structure of the qualification allows education and training providers to tailor mathematics programmes to meet candidate needs, and the local or national needs for a wide range of employment opportunities. The qualification can include credits from both unit standards and achievement standards. Credits achieved towards the qualification can also be used towards the National Certificate in Educational Achievement (Level 1) [Ref: 0928] (NCEA).

This qualification can lead to the National Certificate in Mathematics (Level 2) [Ref: 1080].

Credit Range

| Level 1 or above credits | 40 |
Requirements for Award of Qualification

Award of NZQF National Qualifications

Credit gained for a standard may be used only once to meet the requirements of this qualification.

Unit standards and achievement standards that are equivalent in outcome are mutually exclusive for the purpose of award. The table of mutually exclusive standards is provided on the New Zealand Qualifications Authority (NZQA) website: http://www.nzqa.govt.nz/qualifications-standards/standards/standards-exclusion-list/.

Reviewed standards that continue to recognise the same overall outcome are registered as new versions and retain their identification number (ID). Any version of a standard with the same ID may be used to meet qualification requirements that list the ID and/or that specify the past or current classification of the standard.

Summary of Requirements

- A minimum of 40 credits at Level 1 or above
- Elective A – A minimum of 30 credits as specified
- Elective B – A maximum of 5 credits as specified
- Balance – Balance if required

Detailed Requirements

Elective A

A minimum of 30 credits

Balance

The balance of credits to achieve
A minimum of 40 credits at Level 1 or above
May come from anywhere on the DAS

Transition Arrangements

Version 2

Version 2 was issued following review of unit and achievement standards in the Mathematics and Statistic and Probability subfields.
Changes to structure and content
- Purpose statement has been updated.
- Reference to the Mathematics in the New Zealand Curriculum, have been removed.
- The Personal Financial Management domain has been added to a new Elective B.
- The requirement for specified minimum credits from the domains Number and Measurement has been removed.

For detailed information see Review Summaries on the NZQA website.

All existing candidates may either complete version 1 of this qualification or transfer to version 2. The start date for programmes or courses for version 2 is at the time of registration.

It is not intended that anyone be disadvantaged by this revision. However, anyone who feels they have been disadvantaged may appeal to NZQA – National Qualifications Services at the address below.

Certification

This certificate will display the logos of NZQA and the organisation that has been granted consent to assess against standards that meet the requirements of the qualification (accredited).

Classification

This qualification is classified according to the classification system listed on the Directory of Assessment Standards (DAS) and the New Zealand Standard Classification of Education (NZSCED) system as specified below.

Quality Management Systems

Providers and Industry Training Organisations must be granted consent to assess by a recognised Quality Assurance Body before they can register credits from assessment against standards. Organisation with consent to assess and Industry Training Organisations assessing against standards must engage with the moderation system that applies to those standards. Consent to assess requirements and the moderation system are outlined in the associated Consent and Moderation Requirements (CMR) for each standard.
