

40321 Explain flat bed die cutting machinery and identify die cutting faults in fibreboard packaging

Kaupae Level	2
Whiwhinga Credit	5
Whāinga Purpose	<p>This skill standard is intended for people who are new to the fibreboard packaging industry or are new to assistant operator roles. They will be able to explain flat bed die cutting machinery used in the fibreboard packaging industry and identify flat bed die cutting faults and their corrective actions.</p> <p>This skill standard aligns with the New Zealand Certificate in Fibreboard Packaging (Level 2) [Ref: 1818].</p>

Hua o te ako me Paearu aromatawai | Learning outcomes and assessment criteria

Hua o te ako Learning outcomes	Paearu aromatawai Assessment criteria
1. Explain flat bed die cutting machinery used in the fibreboard packaging industry.	a. Identify the main components of a flat bed die cutter and describe their functions.
	b. Describe faults which result from inaccurate use and setting of a flat bed die cutter.
	c. Explain the required adjustments to flat bed die cutter components in terms of workplace procedures.
	d. Describe die rubbering requirements in terms of workplace procedures and the consequences of incorrect rubber mounting.
	e. Describe different types of cutting rules used in the workplace.
	f. Explain the requirements for handling and storing dies in the workplace.
2. Identify flat bed die cutting faults and describe their causes and corrective actions.	a. Identify flat bed die cutting faults from samples.
	b. Describe causes and corrective actions for each identified fault in 2a.

Pārongo aromatawai me te taumata paearu | Assessment information and grade criteria

Assessment specifications:

- Samples may include photographs, diagrams or physical samples.
- A minimum of six faults must be identified. For each identified fault, a minimum of two causes and one corrective action for each cause must be evidenced.

Evidence presented for assessment against this skill standard must be consistent with safe working practices and be in accordance with applicable service information, workplace procedures and legislative requirements.

Definitions

Flat bed die cutting faults include board sticks to die, board fractured or crushed at cut and/or crease, hanging trim, intermittent cut, uncut corners, incorrect nicking of multiple ups, board crust, size variation in blanks.

Workplace procedures refer to organisation policies and procedures that are documented in memo, electronic, or manual format and available in the workplace. They may include but are not limited to – standard operating procedures, site specific procedures, site safety procedures, equipment operating procedures, quality assurance procedures, product quality specifications, manufacturer's requirements, references, approved codes of practice, housekeeping standards, environmental considerations, on-site briefings, supervisor's instructions, and procedures to comply with legislative and local body requirements relevant to the fibreboard packaging industry.

Ngā momo whiwhinga | Grades available

Achieved

Ihirangi waitohu | Indicative content

Flat bed die cutting machinery

- Identification of flat bed die cutting machinery components including die attachment points, chase or other cutting plate, adjustment and setting components, pressure controls, feed mechanisms, stripping mechanism.
- Die rubbering requirements such as durometer, width, height, style and position.
- Different types of rules such as cutting, creasing and perforating.
- Awareness of the importance of correct machine set up.
- Identification of flat bed die cutting machinery faults and corrective actions.

Rauemi | Resources

Legislation relevant to this skill standard includes but is not limited to:

- Health and Safety at Work Act 2015.

Any new, amended or replacement Acts, regulations, standards, codes of practice, guidelines, or authority requirements or conditions affecting this skill standard will take precedence for assessment purposes, pending review of this skill standard. Legislation can be accessed at:
