

40469**Prepare to maintain and diagnose faults in outdoor power equipment cutting systems**

Kaupae Level	4
Whiwhinga Credit	3
Whāinga Purpose	<p>This skill standard is intended for people already working in the outdoor power equipment industry. People credited with this skill standard can prepare cutting systems for maintenance and explain fault diagnosis in cutting systems.</p> <p>This standard can be used in programmes incorporating the use of outdoor power equipment.</p>

Hua o te ako me Paearu aromatawai | Learning outcomes and assessment criteria

Hua o te ako Learning outcomes	Paearu aromatawai Assessment criteria
1. Prepare to maintain and diagnose faults in outdoor power equipment cutting systems	a. Describe different cutting systems and explain how they operate.
	b. Identify the components of cutting systems.
	c. Explain how to maintain cutting systems.
	d. Summarise the assembly and set up of cutting systems.
	e. Explain how to diagnose faults in cutting systems.

Pārongo aromatawai me te taumata paearu | Assessment information and grade criteria*Assessment specifications*

The evidence presented for assessment against this skill standard must be consistent with safe working procedures and be in accordance with applicable service information.

Evidence must include five different cutting systems.

Cutting maintenance must include:

- sharpening
- clearances
- angles
- safety systems
- guards.

Definitions

Service information refers to technical information for a vehicle, machine, or product detailing operation; installation and servicing procedures; manufacturer instructions; technical terms and descriptions; and detailed illustrations.

Workplace procedures refer to organisation policies and procedures that are documented in memo, electronic, or manual format and available in the workplace. They may include but are not limited to – standard operating procedures, site specific procedures, site safety procedures, equipment operating procedures, quality assurance procedures, product quality specifications, manufacturer's requirements, references, approved codes of practice, housekeeping standards, environmental considerations, on-site briefings, supervisor's instructions, and procedures to comply with legislative and local body requirements relevant to the automotive industry.
