Determine the maintenance requirements and fault diagnosis methods for earth compacting machine systems

Kaupae Level	4
Whiwhinga Credit	4
Whāinga Purpose	<p>This skill standard is intended for people already working in the outdoor power equipment industry. People credited with this skill standard can describe earth compacting machine systems, explain how they are maintained and how to diagnose faults.</p> <p>This standard can be used in programmes incorporating the use of outdoor power equipment.</p>

Hua o te ako me Paearu aromatawai | Learning outcomes and assessment criteria

Hua o te ako Learning outcomes	Paearu aromatawai Assessment criteria
1. Describe earth compacting machines.	a. Describe types of earth compacting machines.
	b. Identify the components of earth compacting machines.
	c. Explain how earth compacting machines work.
2. Explain how to maintain earth compacting systems.	a. Explain how to maintain earth compacting systems.
3. Explain how to diagnose faults in earth compacting systems.	a. Explain ways to diagnose faults in earth compacting machine systems.

Pārongo aromatawai me te taumata paearu | Assessment information and grade criteria

Assessment specifications

The evidence presented for assessment against this skill standard must be consistent with safe working procedures and be in accordance with applicable service information.

This skill standard relates to compacting machine systems with weights of 400kg or less only.

Definitions

Earth compacting machines include vibrating and ramming types.

Service information refers to technical information for a vehicle, machine, or product detailing operation; installation and servicing procedures; manufacturer instructions; technical terms and descriptions; and detailed illustrations.

Workplace procedures refer to organisation policies and procedures that are documented in memo, electronic, or manual format and available in the workplace. They may include but are not limited to – standard operating procedures, site specific procedures, site safety procedures, equipment operating procedures, quality assurance procedures, product quality specifications, manufacturer's requirements, references, approved codes of practice, housekeeping standards, environmental considerations, on-site briefings, supervisor's instructions, and procedures to comply with legislative and local body requirements relevant to the automotive industry.
