Hua o te ako Learning outcomes	Paearu aromatawai Assessment criteria
1. Monitor and maintain pre-established static TTM controls.	a. Discrepancies in the site handover or paperwork are identified and any issues are escalated in line with organisational requirements.
	b. Site briefings and inductions are completed in line with the Traffic Management Plan (TMP), the risk assessment, and any changing site conditions are identified and actioned.
	c. Site conditions are monitored to check alignment with the TMP and risk assessment.
	d. New site conditions that affect the safety of site or the crew are communicated to site personnel.
	e. TTM controls for the activity are maintained in compliance with the TMP and issues are escalated in line with organisational requirements.
	f. Onsite records are maintained in line with organisational requirements.

Pārongo aromatawai me te taumata paearu | Assessment information and grade criteria

Assessment specifications:

To achieve this standard, assessment will take place where the person conducting a business or undertaking (PCBU) has the overall responsibility to ensure the safety of TTM personnel as they monitor and maintain the TTM activity in line with the Health and Safety at Work Act 2015.

This skill standard is for people who need the skills to monitor and maintain a pre-established static site for a TTM activity. They receive a site handover briefing. It covers the operation and maintenance of the site, not the setting up or uplift of the site.

Organisational requirements refer to policy, procedures, and methodologies of the organisation. They include legislative and regulatory requirements that may apply across the organisation or to a specific

TTM zone. Requirements are documented in the organisation health and safety plans, TMPs, practice notes, contract work programmes, quality plans, policies, and procedural documents.

TTM controls refer to a way of eliminating or minimising risks to health and safety.

Ngā momo whiwhinga | Grades available

Achieved

Ihirangi waitohu | Indicative content

Site briefings and inductions

- Verification of the risk assessment and new risk.
- Site and situational awareness, risk identification, actioning responses to risk onsite.
- Checking TMP is still fit for purpose for the activity and the environment.

Monitor the TTM controls

- Monitoring the process for identifying changing site conditions.
- Phasing the work, regular checks of the site by the TTM monitor.
- Organisational requirements for the escalation of issues or changing site conditions.
- Emergency response procedures for a TTM worksite.
- Planning for contingencies in line with the TMP.

Maintain on-site records

- Completing paperwork.
- Reading a TMP.
