Pārongo aromatawai me te taumata paearu | Assessment information and grade criteria

Assessment specifications:

Candidates must be capable of consistently completing installation or repair of structures in a traction network.

Installation or repair structures can include:

- Composite
- Concrete
- Steel
- Wood.

Assessment evidence must include load requirements and configuration of traction support fittings.

A worksite and safety plan must show consideration of asset owner's requirements with reference to relevant company policies and procedures, work instructions, product quality specifications, and legislative requirements.

This skill standard underpins one of two capstone assessments for registration with the EWRB for the practical skill set of a traction line mechanic in the electricity supply sector.
