The Boating Industry Training Organisation has decided that the unit standards listed above, which were registered in May, June, August and September 1997 and April 1998, should have their period of registration extended.

The opportunity of the rollover was taken to address inaccuracies in the documents. The unit standards in **bold** have been revised to correct references to legislation and publications, and titles of prerequisite unit standards.

The reason for the rollover is to maintain the currency of the unit standards until they have been reviewed.

The review of these unit standards is planned to take place during 2005.
