

Main changes resulting from the review

The review process has resulted in the following changes to the standards:

- standardisation of all Special Notes, including expanded definitions sections;
- inclusion of the statement that achieving any one of these units will not on its own enable the applicant to obtain the particular driver licence or endorsement;
- level increased from 2 to 3 in standards 17579 and 17580;
- credits increased from 5 to 7 in standards 17576.

For standards 17574-17577:

- new element focusing on personal factors that contribute to safe driving practice;
- driving techniques which must be demonstrated for assessment are defined;
- new element focusing on operating a heavy motor vehicle efficiently;
- new element on driving hours and logbooks;
- new element requiring knowledge of actions to be taken in the event of an accident;
- requirements of elements and performance criteria allow for recent and future technological changes;
- special note explaining relationships between these standards and previously registered standards added.

Unit standards categorised as category D expire at the end of December 2008.
