

FIELD ENGINEERING AND TECHNOLOGY**Revision and Rollover of *Electrical Service Technician* unit standards**

Subfield	Domain	Id
Electrical Engineering	Electrical Service Technician	17798-17811

The ElectroTechnology Industry Training Organisation has decided that the unit standards listed above, which were registered in November 2000, should have their period of registration extended.

The reason for the rollover is to maintain the currency of the unit standards until there is sufficient information available to inform a full review.

The opportunity has been taken to update legislation and standards references in the unit standards, and minor editorial changes have been made to the titles of 17807, 17809, 17810 and 17811.

The review of these unit standards is planned to take place during 2006.

Date new versions published	May 2004
New comments by date	January 2005
Expiry date of new versions of the unit standards	December 2006
