

Main changes resulting from the revision

- All the unit standards, apart from unit standard 15560, have been reclassified
- Three unit standards have had minor changes in their titles
- Entry requirements have been changed for unit standard 17569
- The term 'enterprise' has replaced by 'industry' throughout the unit standards
- Special notes have been updated for consistency of style and to reflect changes in compliance requirements
- Minor adjustments and corrections have been made to purpose statements, elements, performance criteria, and ranges
- Unit standard 17569 has had some content changes.

Impact on existing provider accreditations

Appropriate extensions to provider accreditations have been negotiated between ESITO and individual providers. This is due to safety and physical equipment requirements for programme delivery within some domains.

Impact on Accreditation and Moderation Action Plan (AMAP)

AMAP 0120 has been updated to reflect the reclassification changes.

Impact on existing qualifications

The following ESITO qualifications are affected by this revision and reclassification and will be revised accordingly.

Ref	Qualification Title
0869	National Certificate in Electricity Supply (Cable Jointer – Low Voltage) (Level 3)
0872	National Certificate in Electricity Supply (Live Line Mechanic – Transmission) (Level 4)
0874	National Certificate in Electricity Supply (Line Mechanic – Distribution) (Level 4) with optional strands in Glove and Barrier, and Hot Stick
0889	National Certificate in Electricity Supply (Operator) (Level 3) with strands in Hydro Operations, and Network Operations
0892	National Certificate in Electricity Supply (Network Operator) (Level 4)
0917	National Certificate in Electricity Supply (Technician) (Level 4) with strands in Control and Instrumentation, Power Technician, and HVDC Technician; and an optional strand in Electrical Services
0921	National Certificate in Electricity Supply (Electrical) (Level 4) with optional strands in Electrical Fitter Networks, and Electrical Fitter Hydro

No other standard setting bodies' qualifications are affected.

Summary of main changes to standards' classification, titles, levels, and credits

The following table shows the changes made to the standards. All changes are in **bold**.

Subfield Electricity Supply

Id	Domain	Title	Level	Credit
15560	Electricity Supply – Design and Commissioning	Commission and re-commission electricity generation plant Commission and re-commission plant in the electricity supply industry	6	12
16283	Electricity Networks Electricity Supply – Core Skills	Remove electricity supply field network equipment from service for access to work (Field Operations)	4	8
17028	Electricity Networks Electricity Supply – Core Skills	Demonstrate the requirements for holding permits on high voltage electrical equipment	3	2
17568	Electricity Networks Electricity Supply – Distribution Networks	Restore supply of electricity in a distribution environment	4	6
17569	Electricity Networks Electricity Supply – Transmission Networks	Replace transmission towers and tower cross arms Replace transmission tower and tower cross arms	4	12
17570	Electricity Networks Electricity Supply – Live Work	Carry out short term inspections of tower structures up to line voltage live line MAD Carry out short term inspections of structures up to line voltage live line MAD	3	6
17571	Electricity Networks Electricity Supply – Live Work	Repair and replace mid span joints on live electricity network transmission lines Repair and replace mid-span joints on live electricity network transmission lines	4	12
17572	Electricity Networks Electricity Supply – Live Work	Prepare working zone for applying protective coatings to tower steel within MAD	3	4
