FIELD PLANNING AND CONSTRUCTION

Rollover and Revision of *Core Construction* unit standards 17516, 17515, and 9184

Subfield	Domain	Id
Construction Trades	Core Construction	9184, 17515, 17516

The Building and Construction Industry Training Organisation has decided that the unit standards listed above, which were registered in February 2000 and June 2000 respectively, should have their period of registration extended.

The reason for the rollover is to maintain the currency of the unit standards until they have been reviewed. The rollover prompted a revision of the unit standards in order to update references and make some minor editorial amendments. No substantive changes resulted from the revision.

The review of these unit standards is planned to take place during 2006.

Date new versions published **August 2005**

New comments by date **December 2005**

Expiry date of new versions of the unit standards **December 2006**

Reason for the revision

The planned rollover of these unit standards provided an opportunity for some minor revisions to take place. There were no changes made to classifications, titles, levels, credits, or other substantive matters. Therefore, no impact on existing qualifications, accreditations, or the AMAP resulted from the revision. A full review of these unit standards, with consultation of stakeholders, is planned for 2006.

Main changes resulting from the revision

- Correction to legislation references in the special notes
- Correction to titles of New Zealand standards in the special notes
- Minor editorial amendments.

Impact on existing provider accreditations

None.

Impact on existing qualifications

None.
