

**FIELD PLANNING AND CONSTRUCTION****Change of responsibility for, and Review of, *Core Construction* unit standard 2551**

<b>Subfield</b>	<b>Domain</b>	<b>Id</b>
Construction Trades	Core Construction	2551

Responsibility for the unit standard referred to above, which was registered in 2001 has been transferred from the Joinery Industry Training Organisation to the **Building and Construction Industry Training Organisation**.

**Date new version published** **July 2005**

**New comments by date** **July 2009**

**Expiry date of new version of the unit standard** **December 2010**

**Rationale for the change**

The Joinery ITO, which previously had responsibility for this unit standard, is no longer using it. However nine Building and Construction Industry Training Organisation qualifications contain this unit standard, so it was felt that BCITO should assume responsibility for it. This view is supported by Joinery ITO. Upon consultation with industry, element 3 'Use powder powered tools' was found to be only relevant to a small number of trades, and it was felt that the generic purpose of the unit standard would be better served by removing the element and making available a specific list of tools for each trade (including powder-powered tools for the relevant trades) by contacting BCITO.

**Main changes resulting from the review**

- Element 3 has been removed.
- The purpose statement has been changed to reflect the content of the two remaining elements.
- The moderation statement has been changed to reflect the inclusion in BCITO AMAP 0048.
- Special notes have been changed to include definitions, legislation requirements and to update information regarding the range of tools required for assessment.
- Small changes have been made to the elements and performance criteria for consistency and to suit the generic purpose of the unit standard.

**Impact on existing provider accreditations**

None.

**Impact on Accreditation and Moderation Action Plan (AMAP)**

Unit standard 2551 is now covered by Building and Construction Industry Training Organisation AMAP 0048. Joinery Industry Training Organisation AMAP 0073 has been updated to reflect the change.

## Impact on existing qualifications

None.

There have been no changes to title, level, credit or classification as a result of the review.

### Key to review category

- A** Dates changed, but no other changes are made - the new version of the standard carries the same Id and a new version number
- B** Changes made, but the overall outcome remains the same - the new version of the standard carries the same Id and a new version number
- C** Major changes that necessitate the registration of a replacement standard with a new Id
- D** Standard will expire and not be replaced
