Rollover and Revision

Subfield	Domain	Id
Construction Trades	Core Construction	2543, 2546 , 2548-2551, 2554, 2556 , 2557, 2558

The Joinery Industry Training Organisation has decided that the unit standards listed above, which were registered in August 1995, should have their period of registration extended. The unit standards in **bold** have also been revised.

Feedback from industry, training providers and other stakeholders has indicated that these unit standards reflect current workplace practices and are still relevant to industry in their present format, and therefore no changes are required at this time.

The review of these unit standards is planned to take place during 2007.

Date new versions published **June 2005**

New comments by date **December 2006**

Expiry date of new versions of the unit standards **December 2007**

Reason for the revision

- to update special notes
- to correct purpose statement of unit standard 2546

Review

Subfield	Domain	Id
Construction Trades	Core Construction	2552, 2555

The Joinery Industry Training Organisation has completed the review of the unit standards listed above that were registered in August 1995 and December 1999.

Date new versions published **June 2006**

New comments by date **June 2009**

Expiry date of new versions of the unit standards **December 2010**

Summary of review and consultation process

Feedback from industry, training providers, and moderators indicated that some unit standards required updating to reflect current industry practices and to make minor amendments to content to allow for consistency of assessment. Unit standards were also due for review as they had reached their expiry date.

A panel of industry representation was convened. Changes were agreed and incorporated. Updated unit standards were sent out to all stakeholders for feedback. Individual industry people or training providers with specific expertise were also consulted on details relevant to their area of expertise.

The Joinery ITO is now satisfied that the views of all stakeholders have been taken into consideration for the new versions of these unit standards.

Main changes resulting from the review

- Unit standard 2552 has a thicknesser added as one of the fixed machines required for assessment. Comma added in title.
- Unit standard 2555 now relates to mechanical fixings to reflect industry practice.

Impact on existing provider accreditations

None.

Impact on Accreditation and Moderation Action Plan (AMAP)

None.

Impact on existing qualifications

Qualifications that contain the reviewed standards or classifications are tabled below.

Affected	The qualification lists a reviewed classification (domain or subfield) in an elective set The qualification lists a standard that has changes to level or credits The qualification lists a C or D category standard
Not materially affected	The qualification lists a standard that has a new title The qualification lists a standard that has a new classification

The following Joinery ITO qualifications are not materially affected by the changes. They will be updated when they are next reviewed.

Qualification title	Standard in the qualification
National Certificate in Joinery (Aluminium Fabrication) [Ref: 0389]	2555
National Certificate in Joinery (Introduction) [Ref: 0385]	2555
National Certificate Joinery (Laminate Fabrication) [Ref: 0390]	2555

Summary of main changes to standards' Ids, classification, titles, levels, and credits

The following summary shows the changes made to the standards as a result of the review. All changes are in **bold**.

Key to review category

- A** Dates changed, but no other changes are made - the new version of the standard carries the same Id and a new version number
- B** Changes made, but the overall outcome remains the same - the new version of the standard carries the same Id and a new version number
- C** Major changes that necessitate the registration of a replacement standard with a new Id
- D** Standard will expire and not be replaced.
