

## Review

Subfield	Domain	Id
Glass and Glazing	General Glass and Glazing	19605
Joinery	Joinery Machining	8611, 10173, 17136
	Laminate Fabrication	2538
	Stairs and Other Joinery Trade Skills	2522, 2545, 2547, 2553

The Joinery Industry Training Organisation has completed the review of the unit standards listed above that were registered in August 1995, November 1996, February and October 1997, December 1999, and September 2002.

**Date new versions published** **June 2006**

**New comments by date** **June 2009**

**Expiry date of new versions of the unit standards** **December 2010**

### Summary of review and consultation process

Feedback from industry, training providers, and moderators indicated that some unit standards required updating to reflect current industry practices and to make minor amendments to content to allow for consistency of assessment. Unit standards were also due for review as they had reached their expiry date.

Panels of industry representation were convened. Changes were agreed and incorporated. Updated unit standards were sent out to all stakeholders for feedback. Individual industry people or training providers with specific expertise were also consulted on details relevant to their area of expertise.

The Joinery ITO is now satisfied that the views of all stakeholders have been taken into consideration for the new versions of these unit standards.

Unit standards in domain General Glass and Glazing (other than unit standard 19605) and unit standards 15755 and 15756 are due to expire in December 2005, and their review will commence in mid 2005.

### Main changes resulting from the review

- Unit standard 19605 is expanded to include the requirements for the joinery industry as well as the glass and glazing industry.
- Special notes for unit standard 10173 are updated to assist interpretation.
- Unit 8611 has element 3 deleted as it is no longer a requirement for industry, and credits have been reduced from 8 to 6.
- Unit standard 17136 is clarified by amendment to the title to reflect the elements.
- Element 2 in unit standard 2538 has changed from practical to theory as this was found to be a barrier to completion for some candidates. Special notes have also been added around definitions and legislation to assist interpretation.

- The title of unit standard 2522 has changed, and the elements and performance criteria have been amended to match, as previously the practical elements caused a barrier to completion for some trainees who did not have the opportunity for practical assessment in their workplace.
- Unit standard 2553 has special note 4 deleted as knowledge of New Zealand standards is not a requirement for this unit standard.
- Unit standard 2545 is simplified with changes to element 1 to reflect the actual requirements for trainees and New Zealand standards have been added to the special notes.
- Unit standard 2547 has increased in credits from 3 to 4 to reflect the time taken to achieve competency.
- New unit standard 21811 covers knowledge of computer numerical controlled (CNC) machines for laminate fabrication.
- New unit standard 21812 covers use of narrow belt and edge sanders.

### Impact on existing provider accreditations

None.

### Impact on Accreditation and Moderation Action Plan (AMAP)

None.

### Impact on existing qualifications

Qualifications that contain the reviewed standards or classifications are tabled below.

<b>Affected</b>	The qualification lists a reviewed classification (domain or subfield) in an elective set The qualification lists a standard that has changes to level or credits The qualification lists a C or D category standard
<b>Not materially affected</b>	The qualification lists a standard that has a new title The qualification lists a standard that has a new classification

The following Joinery ITO qualification is affected by the outcome of this review and will be reviewed in June 2006.

Qualification title	Standard in the qualification
National Certificate in Joinery (Craftsperson) [Ref: 0386]	2522, 2553, <b>2547</b> , 17136

The following Joinery ITO qualifications are not materially affected by the changes. They will be updated when they are next reviewed.

Qualification title	Standard in the qualification
National Certificate in Glass and Glazing (Introduction) (Level 2) [Ref: 0997]	19605
National Certificate in Joinery (Component Machining) [Ref: 0730]	17136
National Certificate in Joinery with strands in Cabinetry, Exterior Joinery, and Stairs [Ref: 0387]	2522, 17136

## Summary of main changes to standards' Ids, classification, titles, levels, and credits

The following summary shows the changes made to the standards as a result of the review. All changes are in **bold**.

Key to review category	
<b>A</b>	Dates changed, but no other changes are made - the new version of the standard carries the same Id and a new version number
<b>B</b>	Changes made, but the overall outcome remains the same - the new version of the standard carries the same Id and a new version number
<b>C</b>	Major changes that necessitate the registration of a replacement standard with a new Id
<b>D</b>	Standard will expire and not be replaced.

Subfield      Glass and Glazing
