

FIELD MĀORI**Change to planned review date for *Māori Business and Management* qualifications****National Certificate in Māori Business and Management [Ref: 0365]****National Diploma in Māori Business and Management with an optional strand in Iwi Management [Ref: 0366]**

NZQA Māori Qualification Services decided on a change to the planned review date for qualifications listed above, which were registered in 1997.

The reason for the change to the planned review date was that the qualifications had not been used sufficiently to warrant a review at this stage.

Although no changes were made to structure or content, the opportunity was taken to clarify the transition arrangements and present classification changes in tabular form when the qualifications were placed on the new template.

Date new versions published**March 2005****New planned review date****December 2008**
