

FIELD ENGINEERING AND TECHNOLOGY**Revision of *Roadmarking* unit standard 15934**

Subfield	Domain	Id
Highway construction and maintenance	Roadmarking	15934

InfraTrain New Zealand has revised the unit standard listed above, which was registered in September 2005.

Date new versions published

June 2006

Planned review date

September 2009

Reason for the revision

During the development of the proposed National Certificate in Roadmarking (Operator) with strands in A-Type Applicator and B-Type Applicator with optional strands in Materials Loading, Raised Pavement Markers, Piloting on Level 1 Roads, Piloting on Level 2 and 3 Roads, Temporary Traffic Management on Level 2 and 3 Roads, and Preformed Thermoplastics, it was decided to revise the entry requirements for this unit standard.

The prerequisites were creating barriers for people not working on Level 2 and 3 roads who were therefore unable to meet the requirements of Unit 20879, *Operate as a Site Traffic Management Supervisor – Non Practising (STMS-NP) for Level 2 and 3 roads*, and Unit 20880, *Operate as a Site Traffic Management Supervisor (STMS) for Level 2 and 3 roads*.

The prerequisite Unit 5627, *Operate as a Traffic Controller (TC) for low volume and Level 1 roads*, remains.

Main changes resulting from the revision

Removal of unit standards 20879 and 20880 from entry information.

Impact on existing provider accreditations

None.

Impact on Accreditation and Moderation Action Plan (AMAP)

None.

Impact on existing qualifications

None.
