FIELD ENGINEERING AND TECHNOLOGY

Revision of *Underground Extraction* unit standard 21279

Subfield	Domain	Id
Extractive Industries	Underground Extraction	21279

The New Zealand Extractive Industries Training Organisation has revised the unit standard above.

Date new version published **June 2006**

Planned review date **November 2009**

Reason for the revision

- To accurately convey the specific mobile machines to which the unit standard refers.

Main changes resulting from the revision

- The title has been modified to clarify the intent of the unit standard.
- A special note has been added to identify the range of mobile machines. Some brand names have been used because they are the commonly known names of the machines. Any alternative name would not accurately identify the type of machine.
- The minimum number of mobile machines has been added to relevant elements.
